INTRODUCTION.

THE materials used and the method followed in the present volume of "Calendar of Treasury Books and Papers" are exactly the same as in the preceding volume. No further word of general guidance, therefore, as to either material or method is necessary. The Calendar proceeds regularly year by year. In each year all the entries from the Minute Book, without exception, and also every other entry of greater historical importance or interest, whether in the Entry Books or in the Treasury Board Papers, are thrown into the text: all entries of minor historical importance or interest, whether in the Entry Books or in the Treasury Board Papers, are thrown into table I.: all entries of warrants, &c., relating to payments of money, are thrown into table II.: finally all entries, &c., relating to appointments are thrown into table III. This order of *(a)* text, *(b)* table I., *(c)* table II., *(d)* table III., for each separate and single year is followed throughout. Any inconvenience from such an arrangement (which is the only possible one in the case of matter so miscellaneous, of so varied and unequal interest, and, in many cases, *e.g.*, money warrant entries, of so purely departmental or routine or official a character) will, it is hoped, be found to be obviated by the method and fulness of the index, on which special care has been bestowed.

After the previous introduction to the preceding two volumes of this Calendar, nothing further than this is now needed by way of recapitulation as to material and method. As, however, some doubt has been expressed with regard to the correctness of the decision to exclude from the materials used here, the series of accounts known as Lowther's Accounts, it may be well to raise the question once for all, with the object of obtaining a final pronouncement upon it. The impression used to prevail, and apparently, in places, still prevails lingeringly, that Lowther's Accounts are Secret Service books, or represent one department of Secret Service expenditure. A careful examination will reveal that this is not the case, and will, it is hoped, by contrast, disclose the real nature of the Secret Service system under George II., and at the same time prove the substantial correctness of the description of those documents given in the preface to vol. I. of the present Calendar of "Treasury Books and Papers" (Preface 1729-30 pp. vi.-viii.).

Let it be premised, however, once again and for all, that whatever the nature of the items of payment revealed in "Lowther's Accounts," as they are mere books of account they could not possibly enter into the scheme of a calendar, any more than could the Quarterly Establishment books, the Civil List books, &c., &c. (described in the above quoted preface, p. v.), of which there exist literally thousands of volumes amongst the records of the Treasury.

However, laying this (in itself quite final) consideration aside for the moment, a close impartial examination of Lowther's Accounts will, it is hoped, establish the following points:

(1) The "King's Money," the fund or account of which Thomas Lowther acted as Paymaster,

was instituted primarily (*a*) to provide for the payment of clerical fees at the Treasury and (or) Exchequer in the case of such payments as it was thought fitting should be made without any deduction for fees or poundage ; and (*b*) to provide for payments of small bounties in cases where there were either no means of or no justification for the more formal placing of a person on the establishment payable by the Paymaster of Pensions.

(2) Such payments out of this fund of the "King's Money" as are not of the above perfectly justifiable description, such payments, that is, as partake or seem to partake of an occult nature, will be found almost invariably accounted for in some one or other of the Treasury Records which are calendared in the present calendar. In a preponderating number of cases, the items of expenditure will be found to be "vouched" or authorised by a direct resolution of the Lords of the Treasury at their Board meeting, and as such will be found in the Minute Book.

This fact alone will serve instantly to differentiate these items from true Secret Service items. Nothing is more remarkable than the rigid silence which all the existing Treasury records preserve, with regard to the expenditure of the Secret Service money proper. Periodically, moneys, to large amounts, appear as voted into the hands of the Secretary to the Treasury for [his] Secret Service, or into the hands of the two Secretaries of State for [their] Secret Service. But of the expenditure of that

money there is not a word—neither actual vote in the Minute Book, nor warrant in the various money and other books, nor even scattered and accidental reference in the Treasury Board papers. When, therefore, we find, as we do in the Minute Book, sums of a few hundred pounds voted by the Treasury Lords to be paid to the proprietor or printer of, say, the "Free Briton," for writing and printing, and that that sum should be paid by Mr. Lowther out of the King's Money into his hands, the very fact of the entry thus openly appearing in the Minute Book is *per se* evidence that the item was not considered a secret service item. In the index to this Calendar all such items are brought together under the head of "newspapers" (subsidising of); but such a description is not to be taken as implying necessarily a subsidising of newspapers out of secret service money. That it was a subsidising, and therefore of an occult nature (an actual payment for 'writing' or editorial, and not merely for actual copies supplied to or distributed for the Government) there can be no reasonable doubt. But it was apparently not of so occult a nature as to necessitate the employment of the Secret Service system. It is of course not impossible that further and still more occult subsidising of the newspapers was conducted, out of the quite other and separate Secret Service fund, but as this is hidden from us it is useless to conjecture. Certainly the total spent on more open support of newspapers through the means of the "King's Money" fund does not seem large. In 1735, for instance, the total was £6,797 18s. 4d.—a sum which has to be divided between at least five newspapers.

The third fact which will emerge from a close examination of Lowther's Accounts is that the bounty list is a genuine petty bounty list—not a secret service list. This will appear instantly from the character of the recipients, from the sums named, and from the *prima facie* probability that such bounties were given (and apparently given annually) by the King *mero motu*

or even by the Treasury Lords on their own initiative as a preferable expedient to swelling the list of *established* pensions. For instance, on the 17th June, 1735, the Treasury Lords order that "Sarah, widow of Thomas Thurkettle, is to be inserted on the next bounty list" (text *infra* p. 30). Thurkettle had been a messenger of the Treasury Office, and had apparently died so poor that the Treasury Lords felt themselves compelled to pay his funeral expenses. In addition, they here appear as making an eleemosynary provision for his widow by way of bounty without the more formal establishing (voting and rendering permanent) of a pension. Probably many of the other items in the bounty list are susceptible of an equally open and unimpeachable explanation, if all the local circumstances were known. These small items which constituted the regular petty bounty list and the additional petty bounty list do not anywhere appear in the ordinary Treasury records. There is no counterpart to or duplicate of them in any of the Entry Books which form the materials of the present "Calendar of Treasury Books and Papers." In order, therefore, to afford some evidence of the recurrence of the items—of the payment of the same bounty to the same individual one year after the other—two complete years of Lowther's accounts are given *infra*. From this it will be seen that this petty bounty list (and additional petty bounty list) formed a fairly stable item, making up a total in 1735 of 1,347*l.* 5*s.* 6*d.*, and in 1736 of £1,411*l.* 0*s.* 6*d.*

In addition, however, to the recurring petty bounty list thus described there are certain (few) largish items of royal bounty which appear out of

place in Lowther's accounts—payments not of 2*l.* or 10*l.* to a decayed widow, but of larger amounts and to men, *e.g.*, the payment of 100*l.* to John Mun, *infra* pp. xxxvi. and 41. This was, doubtless, a payment for service. Mun was in some confidential employ. He had accompanied the Princess of Orange to Holland on her voyage thither after her marriage. He had also been selected as an envoy to the Netherlands (and possibly to France) to discover the secrets of the illicit Irish wool export trade. Now the payments to Mun will be found noticed in the ordinary Treasury records (*infra* pp. 7 and 51). It is, therefore, in reality one of a class of larger royal bounty which is of quite a different nature from that of the petty bounty list contained in Lowther's accounts. It belongs to the class of what may, for distinction's sake, be styled royal bounty proper, large or largish sums paid by direction of the King in the first place, with the consent of the Treasury in the second place, and out of any general funds in the Exchequer in the third place (therefore not out of the King's Money), and, as a rule, in the fourth place, paid as a complimentary present to an ambassador on his taking leave, or to a corporation for a specific purpose named, or to an individual for, presumably, service rendered or expected, or simply as an act of grace on the part of the King. Now all such items of royal bounty proper occur rigorously and of necessity in the regular and usual Treasury Records. The order initiates with the King, and is, therefore, found in the King's Warrant Book. It is executed direct by the Auditor of the Receipt, and therefore, the duplicate entry is (usually) found not in the Money Book but in the Order Book. In most cases, to all

appearances, countersigning or sanctioning by the Treasury Lords was hardly more than formal, but if they did actually debate and formally sanction (or even initiate) a grant of royal bounty, then the entry will appear in the Minute Book.

From all these sources they are gathered into the present Calendar, and will be found focussed in the index under "Royal Bounty." Now, most certainly, if there is anything of an occult or secret service nature in any of the royal bounty items (and as a rule there is not) it would be contained rather in such items than in the petty bounty list of Lowther's Accounts.

The total items in Lowther's Accounts, which appear to be of the nature of the larger royal bounty proper, rather than of the petty bounty list, amount in the year 1735 to £371. They all occur in the regular Treasury records, and the duplicate reference in the present volume of Calendar will be found stated in the extract *infra*. The page of the Calendar in which this duplicate occurs is stated in the right hand column.

Why the Treasury should have chosen to saddle the 'King's Money' with these particular few items, amounting to £371, rather than, as usual, to direct their payment out of any of the funds in the Exchequer, is not capable of explanation. It may have been a matter of temporary cash expediency.

The following are the only entries in 1735 in Lowther's Accounts which appear to belong to the royal bounty proper rather than to the petty bounty list.

By way of *résumé*, therefore, it would appear plain, (1) that the main item of expenditure in Lowther's Accounts is that of Treasury and Exchequer fees mostly 'unvouched' for by the Treasury Lords, but whether 'vouched' or not, entirely devoid of historical interest or importance; (2) that

the items of payments to newspapers are all accounted for in the present calendar; (3) that Lowther's bounty list is a petty bounty list of a purely eleemosynary character, and that whatever items are not of that character will be found to be small, and to be accounted for in the present calendar.

The further few items of petty expenses, petty wages, rent of houses, &c., contained in the accounts form altogether a negligeable quantity, and the general description of them as such will suffice. The items are small, both in number and in amount, they bear a *bonâ fide* stamp, and wherever they have any importance at all they will be found to appear in the body of the present volume of calendar, and to be therefore 'vouched' by the Treasury Lords themselves.

To the general statement, outlined above, of the nature of the payments revealed in Lowther's Account, there are two items of exception which appear to militate against the view set forth, viz., the two following payments out of the year 1735:—

	£	s.	d.
August 28. Paid Samuel Buckley, Esq., for sundry charges and disbursements on his Majesty's service ...	980	14	0
Sept. 6. Paid Mr. John Peele for several charges and disbursements by him made in his Majesty's special services	1750	0	0

The first of these two items is satisfactorily accounted for in the body of the present calendar (*see infra* p. 43), and the entry is, therefore, probably similar in nature to (*i.e.*, the fact of its occurring in Lowther's Accounts, and of the money being ordered to be paid out of the King's money in his hands is due to the same cause as in the case of) the entries of royal bounty proper, which have been already discussed.

That the same was also the case with the second of the above two entries there can be little doubt, but the remarkable and quite mysterious fact is that there is no record of this particular payment in the general Treasury Records, and, therefore, none in the body of the present calendar. The fact is inexplicable, and if it should be asserted that the entry is a secret service item, there would be no way of disproving it. But whatever the nature of this particular transaction, it will not in the least alter the general view established as above as to the real petty nature and non-secret service nature of the series of Lowther's Accounts.

Having thus from internal evidence established the real nature of 'Lowther's Accounts,' a further question arises as to their origin and as to the first employment of a separate fund for Exchequer fees and small bounties, &c., under the specific title of 'King's Money.'

The answer is by no means easy, but certain reliable facts emerge, and may be stated at the outset.

(1) As a distinct and separate fund, 'King's Money' originated with the accession of George I.

(2) Some of the purposes which it served were fulfilled partly and in a very confused way by the Civil List under William III. and Queen Anne.

(3) Therefore in all probability the institution by George I. of the separate 'King's Money' fund was an attempt to remedy the extraordinarily chaotic state of Queen Anne's Civil List, and at the same time was an attempt at retrenchment.

To take point (2) first in order. It is evident that under William that there existed no separate fund for the discharge of Exchequer or Treasury fees, and that where it was thought desirable from reasons of policy to order a payment to be made without deduction or fees, then a separate order had to

be made for the separate issue of a sum equal in amount to the deduction or fees, or for separate allowance of them in account. Apart from the general Exchequer practice, this may be specifically inferred from the terms (italicised) of the following King's Warrant*—

> 1690, Oct. 22. Royal Warrant to the Auditors of Imprests to allow in the accounts of the Earl of Ranelagh, Paymaster of the Forces, two sums, viz., £1,533 7s. 6d. and £917 19s. 6d., being Exchequer fees on three payments of respectively 172,340*l.*, 282,000*l.*, and 10,000*l.*, the said three payments having been ordered to be paid without deduction, "*and that you alsoe allow unto him upon his said accompts such sums as the Exchequer fee amount unto for all other moneys which he hath paid or shall pay by our direction without deduction.*"

In the following year a similar warrant occurs directing one of the Auditors of Imprests to allow the said Earl of Ranelagh a sum of 1,399*l.* 13s. 2d., *being the deduction of 12d. per £ on sums by him paid, and on which he himself by direction made no poundage deduction.*†

With regard to the second type of payments subsequently provided for out of the 'King's Money,' viz., petty bounties, the following entry proves the existence or the tendency to the existence of a separate organization for them.

> 1707, Sept. 27.‡ Royal warrant to the Auditor of the Receipt for the issue of 476*l.* 2s. 11¼d. to Thomas Lowther in satisfaction of so much which has been paid to several persons by the Queen's directions as of her royal bounty.

The curious point is that there is no further trace of Lowther either before this date or after it until he emerges

* King's Warrant Book VIII., pp. 188-9, 1690, October 22. † *Ibid.* VIII., p. 381, 1691, June 5. ‡ Queen's Warrant Book XVI., p. 256.

under George I. as the established Paymaster of the King's Money. But an examination of Queen Anne's Civil List will serve partly to explain this fact. For it will be at once apparent that whilst Spencer Compton (or previously Edward Nicholas) was at the time Paymaster both of Pensions and of Royal Bounties great and small, such a chaos prevailed in the civil list that there were numerous other and simultaneous channels through which gifts of royal or petty bounty could be conveyed, and for one of those side channels Lowther or any other subordinate may well have been employed as a useful nominee or substitute for Compton.

In the three following accounts I give in succession extracts from the Civil List Accounts of Queen Anne for 1706 and 1712, and of George I. for 1715. The extracts are only of such items as relate to pensions, bounties, and secret service and similar or like items, and are in each of the three accounts distinguished by the letters A, B, &c., for the purpose of facilitating comparison.

In account No. 1 it would not be easy to decide from which item petty bounties could be paid. They could be paid either from D or F. But this point is apparently decided in the next account (No. 2) by the words italicised under F, and indicated by the ☞ in the margin. These words make it clear that as a rule casual or petty bounties were paid out of contingencies, and were as a rule paid either by the regular Paymaster of Pensions or directly at the Exchequer.

In account No. 2, item D ('bountys') of No. 1 would appear to be sunk either in the huge total of 108,000*l.* for contingencies (item F), or else in the cognate item B (65,000*l.*).

In No. 3 account the swollen and suspicious total of Queen Anne's 'contingencies' item (108,000*l.*) disappears. It is replaced by a more modest item of 10,980*l.* 7s $0\frac{3}{4}$d.,

* A later account of the Civil List, 1714, August 1, to 1715, September 29 (Treasury Book Papers, 192, No. 47), gives the items somewhat differently as follows:

	£	s.	d.	£	s.	d.
Pensions and annuities at the Exchequer	19,383	2	$9\frac{1}{2}$			
,, ,, ,, Excise ..	13,868	11	$1\frac{3}{4}$

William Lowndes	10,000	0	0			
William Bromley, late Secretary of State	427	7	$11\frac{1}{2}$	17,677	7	$11\frac{1}{2}$
Jewels or presents to Foreign Ministers				12,999	5	3
Contingencies of divers natures ..				51,130	1	$3\frac{3}{4}$

whilst two new items emerge marked Q and R, viz., a small sum of 4,607*l.* 10s. 0d. for 'bounties and other payments' by Mr. Lowther, and an equally insignificant sum of 3,470*l.* 8s. 8d. for presents to foreign Ministers.

A comparison of the first Civil List Account of George I. therefore with the two accounts of Anne (one of which was practically of the year but one preceding) reveals the fact that a double change had been instituted, one of economy, the other of arrangement. The suspicious and evasive item of 'contingencies' was sharply cut down, and in the second place a new item or fund (as yet unnamed, but later to be designated the King's Money) was instituted to serve for the payments of such casual and petty fees and bounties as had previously been paid direct from the Exchequer and as had been thought fit to be preserved and provided for after having been separated from the 'contingencies' item.

The first warrant for a payment to Lowther for the purposes thus outlined was as follows :—

> George R. *
>
> Our will and pleasure is that by virtue of our General Letters of Privy Seal, bearing date the 29th day of Sept., 1714,† you issue and pay, or

* King's Warrant Book, XIX., p. 281.

† The general letters of Privy Seal here referred to merely provide for the continuance of issues and receipts (*i.e.*, of transacting business generally) at the Exchequer, which was, of course, constitutionally and theoretically suspended by the decease of Queen Anne. The letters are, themselves, practically copies of the general letters of Privy Seal issued by Queen Anne herself on the 13th March, 1 Anne for an exactly similar purpose. They are, therefore, perfectly general, and have no special reference whatever to Lowther or the King's Money. They are as follow :

Privy Seal Books, Pells., 1 Geo. I., p. 1.

General letters of Privy Seal.

George by the Grace of God King of Great Britain, France and Ireland, Defender of the Faith, &c., to our High Treasurer, Chancellor, and under Treasurer of our Exchequer, now being, and to our High Treasurer, Chancellor, and under Treasurer of our Exchequer or Commissioners of our Treasury for the time being, greeting. Our will and pleasure is, and we do hereby direct, authorize, and command that out of any of our Treasure or Revenue, from time to time being, and remaining in the receipt of our Exchequer, you issue and pay, or cause to be issued and paid, all such sum and sums of money for any public or particular uses or services, as we, by any warrant or warrants under our Royal sign manual shall direct and appoint, the said sum or sums of money respectively to be paid to such officer or other persons, by way of imprest or otherwise, and in such manner and form in all respects as by such warrant or warrants shall be required or directed. To the Commissioners of our Treasury.

Mem. : The 7th Dec., 1714, their Lordships signed a warrant pursuant to the aforegoing sign manuall.

Having thus explained the nature and origin of the King's Money ' or of ' Lowther's Accounts ' it remains only to show briefly their subsequent history up to the time treated of in the present instalment of Calendar. This will be best done in the abstract which is appended hereto pp. xx. *seq.*, but as far as the mere growth of the fund or item is concerned, the following may be stated in briefest *résumé* as to the issues made on account of it.

It must be left to the general historian to estimate what, if any, constitutional importance attaches to the growth of this yearly item. The object of this preface is only to show the origin of it, and the real use to which it was put, and to set at rest, it is hoped completely, any idea which may still remain, that the King's Money was a Secret Service Fund.

To make this preface and demonstration complete, there is here added a skeleton abstract of the whole of Lowther's Accounts so far as they have been preserved, and an absolutely faithful transcript of two years out of these accounts, the two years (1735 and 1736) being chosen which coincide with the first two years calendared in the present volume.

The transcript is furnished with an extra column on the right hand (which, of course, is not in the original), in which is stated the page of the present vol. of calendar in which the particular transaction can be traced. Failing this, if it is desired to investigate the items *de novo* and piecemeal, it will be easy to do so by working the general index to the present volume.

Lowther's Accounts.

(A) *Skeleton abstract of the whole*, (B) *verbatim transcript of the accounts for two years, viz., 1735 and 1736.*

All that is preserved of the Accounts is comprised in eight folio booklets, as follow :—

Booklet (1) An account of money issued to Mr. Lowther at the Receipt of his Majesty's Exchequer, and by him paid by order of the Right Hon. the Lords Commissioners of his Majesty's Treasury, in pursuance of his Majesty's directions, from his Majesty's accession to the Crown to the 29th of Nov. 1717.

32 pp. and 8 blank pages.

Prefixed. On the front page is the following order of reference.

Whitehall Treasury Chambers, 11th January, 1717-8.

The Right Honourable the Lords Commissioners of his Majesty's Treasury are pleased to refer this book to Thomas Jett, Esq., who is to examine the same with the vouchers to be produced by Mr. Thomas Lowther, and make his report thereupon to their Lordships.

W. Lowndes.

Accordingly there is attached to the said front page the said Auditor Jett's report, dated 1718, June 27, and further a certificate by the Earl of Halifax, Auditor of the

Receipt, of the sums issued at the Exchequer to Lowther from the King's accession in 1717, Nov. 29, to be by the said Lowther "paid and applied to such use and services as his Majesty hath directed, by virtue of the General Letters of Privy Seal, dated the 29th of September, 1714, and upon the particular orders and sign manuals of the dates, and for the sums" detailed.

This certificate and Auditor Jett's report agree in stating the sums issued to Lowther during said time at 13,607*l.* 10*s.*, against which Auditor Jett allows Lowther credit for 13,628*l.* 11*s.* 7*d.* for payments as detailed in said Lowther's book—thus leaving a surplusage or balance due to the accountant of 21*l.* 1*s.* 7*d.*

The report continues:

> "I have carefully examined and cast up the particulars as well on the credit as debt side, and find the same to be exact. He hath likewise produced to me vouchers for the severall payments, except for fees paid at the severall publick offices for Privy Seals and Patents, and at the Exchequer for the money issued to him there: in which cases he hath only produced his own bills, the particulars whereof are hereunto annexed, amounting in the whole to the sum of 4,072*l.* 12*s.* 3*d.*; and after comparing them with other bills of the like nature, I find them to be as customary.
>
> But it does not appear to me by what authority or direction the said payments were made otherwise than by the allegacon of the accountant that the greatest part of them were pursuant to minutes of the Treasury, and others by verbal order of some of their Lordships there for the time being or their secretaries."

Auditor Jett accordingly appends to this his report a paper of these "payments made by Mr. Lowther for which no vouchers appear."

With only two exceptions (viz., Fol. 4, several petty expenses as per bill, 20*l.* 16*s.* 0*d.*: Fol. 8, ditto, 3*l.* 11*s.* 6*d.*), these unvouched payments are entirely of the nature of fees paid to clerks, &c., at the Treasury on the obtaining of money warrants, or at the Exchequer on the actual receipt of the money. The first page of this appended paper of such unvouched papers is as follows. It will serve as a complete exemplification of the whole :—

Booklet (7) An account, &c., *ut supra*, from 1732, Midsummer, to 1735, August 21.

40 pages, 50 blank pages.

Prefixed (*a*) Treasury order of reference, *ut supra*, of date 1741, July 31.

It will be noted that between Booklets 4 and 5 there is a gap, and that the accounts from 1725, Sept. 14, to 1727, June 24, are missing. It will be further noted that in all three succeeding accounts (booklets 5-8) the order of reference is in every case dated 1741, July 31, and the report of Auditor Lowndes likewise in each case 1741, Sept. 22—indicating the absence of any systematic audit of Lowther's accounts from the accession of George II. to 1741.

Jan. 9. 3. Report to the Treasury from the Commissioners of Customs, London, on the petition of Nehemiah Champion and Joseph Beck, on behalf of themselves and other traders in and manufacturers of copper and brass, concerning the obstruction to their trade from the importation, at the present rates, of brass battery and metal prepared. Brass under the denomination of Brass Battery (consisting of kettles for home consumption and pans for export to the coast of Africa), pays a net duty after discount of 1*l.* 10*s.* 4 1-20*d.* per cwt., and the drawback on exportation is 1*l.* 6*s.* $0\frac{3}{4}d.$ Metal prepared for battery (being practically brass battery, wanting only a few spots of the hammer or a few streaks of the turning tool),

1734-5.

pays a net duty of 1*l.* 1*s.* 9 9-20*d.*, and receives a drawback on re-export of 18*s.* 11 5-20*d.* The officers certify that the only difference between battery and metal prepared for battery is that the former is hammered after it comes from the fire, while the latter is not hammered but comes soft from the fire. On a medium of seven years to 1733, Christmas, 7,381*c.* 1*q.* 10*lb.* of metal prepared for battery has been imported as against only 560*c.* 1*q.* 17*bl.* of battery. Endorsed: "My Lords agree with the Commissioners." 3 *pages.*

Appending:—(*a.*) Said petition of Nehemiah Champion and Joseph Beck for the assistance of the Treasury in an application to Parliament for the levelling of the said duties, with the object of stopping the importation of metal prepared for battery, which "would be a means of employing many thousands of our fellow subjects in raising copper ore, calamine, and pitt coal." April 28. **50.** Memorial [to Sir Robert Walpole?] from Ge Beaumont on behalf of the furriers, particularly of the towns of Coventry and Leicester, concerning the almost entire loss of one branch of their trade, viz., the selling of lamb skins dressed with wool on for wear in cold countries, great quantities of which have hitherto been sent

1735.

to Archangel and other parts by our merchants. One furrier of Coventry, who formerly dressed 60,000 skins per annum, now hardly dresses 1,000. At Leicester the furriers have entirely forsaken that particular manufacture, so that the skins are left on the carcasses of lambs that die, and such as are killed by the butchers can't be sold. In time the art and mystery of dressing these skins, being different from that of leather dressers, will be lost. The furriers affirm that this is due to a misconstruction as to the Leather Act, by which they are obliged to pay duty on the wool as well as the skin, though the former weighs twice the latter, as if the wool were leather. These skins are sold to the merchant for about 5½*d.* each, and are bought raw at about half the money. In the Leather Act fur is exempted, and at the first execution of the Act wool was so exempt under the denomination of fur. Referred to the Commissioners of Excise.

The loss to the revenue from the counterfeiting of hands has been inconsiderable. 1½ *pages.* [*Ibid.* No. 2.]

An account of the inconsistencies between the King's warrant for franking letters and the late resolutions of the House of Commons read, as follows:—"The Postmasters by the King's warrant are ordered not to suffer any letters whatsoever other than such as concern the Members themselves to pass under their frank covers or direction, to the diminution and prejudice of the revenue. The Commons, by their resolution, say that the opening or looking into, by any means whatsoever, any letter directed to or signed by the proper hand of any Member without any express warrant in writing from the Secretary of State is a high infringement of the privileges of the House. So that in this case there seems to be an inconsistency between the warrant and the resolution, for how can the Post Office not suffer any letters whatsoever to pass other than such as concern the Members themselves, without opening or looking into the covers of their letters so directed, unless there be ways of discovering such letters other than by opening or looking into the same. The King's warrant, except in this particular, stands unimpeached, and as the said warrant is not once mentioned or taken notice of in the resolutions of the House it may not be thought advisable to make any alteration therein. It may be necessary, however, to notify to the Postmasters the consideration which your Lordships have had touching this affair, and to order them to take care that the resolutions of the House be duly complied with." Ordered that a copy of the resolutions of the House of Commons be transmitted to the

Aug. 21. **125.** Report to the Treasury from the Commissioners for Taxes on the petition of Robert Clarke, Surveyor of Houses for part of Norfolk, for the appointment of an additional surveyor, on account of the largeness of his division. Enclose thereupon a report (*b.*). The appointment of a third surveyor in Norfolk might raise the duties there, which have annually decreased from the commencement of the new duties on houses in 1710. Propose to discharge John (*sic*) Harmer, and employ Humphrey Cony in his place. 2 *pages.*

Appending:—(*a.*) Said petition of Robert Clarke, with order of reference, dated 1735, August 6. 1 *sheet.*

(*b.*) Report to the Commissioners for Taxes from James Underwood, one of the Surveyors General of House Duties, on the proceedings of the two surveyors of said duties for Norfolkshire. In the first division the Surveyor, Samuel (*sic*) Harmer, is a fat unwieldy man that seems not able to survey. His books are no more than a copy of the duplicates returned to the Remembrancer's office, which he has from the Receiver, whose sister he married. He could produce no survey book nor anything to show that he ever surveyed more than one town since he has been employed. He contents himself with attending the Justices for Norwich on the bringing in the assessments, and settling the duties there by seeing that the houses inhabited are charged. "I surveyed at his request his next neighbour's house, there having (as I observed) been some personal difference, where I advanced the new duty, 10*s.* I signed the assessment and left the surcharge with the parish officer. Upon comparing this division for the year 1733 with that of 1726, which was in this surveyor's predecessor's time there's a constant decrease in the duties every year except 1731, amounting in all [to] 190*l.* 7*s.* Add to that what was sunk between the year 1715 and 1726 and it will appear that the duties are lessened in this division [by] 612*l.* 19*s.* The like I hope is not to be parallel'd in the kingdom. These gradual and constant decreases in these duties are generally owing to the negligence of the officers that do not survey, but depend on their interest more than their own merit. I show'd this surveyor the method of keeping a book to enter his surveys regularly in, and gave him all the instructions I am capable of, and hope he will observe them....P.S.—The duties are not settled in the city of Norwich for 1734, which must be owing to the want of a proper application to the Mayor and Justices." Robert Clarke, the surveyor in the second division, lives six miles from Norwich, and has some office under the Bishop of Norwich. His division is large, being 56 miles by 25, and there is employment for two surveyors therein. "This surveyor says in his letter that his last year's account is not compleated, occasion'd by a disagreement between the Justices in three Hundreds, that will not meet each other to settle and sign the duplicates." 3 *pages.*

The

total is 9,005*l.* 2*s.* 5¾*d.* "But as no roll of *in supers* hath been transmitted to us since that time, and that we have no knowledge of the state of His Majesty's land revenue, neither who are Receivers thereof, what arrears are in their hands, or what *in supers* have been set by them in passing their accounts, as well as on the land taxes since the year 1713, we cannot give your Lordships any account thereof, but humbly presume, when we shall be furnished with the necessary accounts from the several offices, other very considerable sums may also be recovered upon those branches of His Majesty's revenue."

Minuted as under September 11, *infra* p. 50. 1 *page.*

Appending:—(*a.*) An account of the several sums of money paid into the Exchequer from 1714, April 15, on the *supers* set by Receivers on certain aids and taxes detailed. 1 *page.*

Sept. 1. **131.** ——— to [Sir Robert Walpole], dated Ironmonger Row, Old Street, proposing an additional duty of 3*d.* per yard on printed linens, being informed that the drapers and linen printers will apply to Parliament next Session for a repeal of the clause in the Act against the wearing of printed calicoes, which prohibits the wear of any stuff mixed with cotton, printed, painted, stained, or dyed; also proposing the imposition of a licence for every retailer of spirituous liquors, to prevent many little chandlers' shops from selling spirits, "at which places they only sell gin, and where servant maids and labouring men's wives, under pretence of going for other things, debauch themselves with that liquor. About a year or two agoe I related to Humphrey Thawyer, one of my honourable masters, the observations I made in visiting my relations in Kent and Sussex, viz., that in every place I went they drank no tea but what was run." To prevent this clandestine trade proposes to rate the tea not at so much per lb. as now, but at so much per cent., as sold at the candle, which would put ordinary teas on an average with fine, and lower their price. *Unfinished.* 1 *page.*

[*Ibid.* No. 41.]

Sept. 3. **132.** Sir Charles Wager to same, dated from Parson's Green. Encloses a translation of Basha Hamet's letter (*a.*), with whom the treaty was made, and to whom Mr. Solicoffre's bill was given for the redemption money agreed upon, viz., about 12,600*l.*, being 350 crowns each for 144 captives, which were brought away accordingly. About 5,000*l.* of the money has not yet been drawn, and some of the bills drawn have gone back protested. "I presume you will think that it is absolutely necessary all those bills should be paid, least, as the Basha threatens, he should pay himself by taking of our merchant ships, which may occasion a new war, and then we shall be obliged to begin a new treaty with the Moors, and it would be the more inconvenient at this time, when the Dutch have sent an Ambassador to endeavour to make peace with those people." The trustees of the different charities for the redemption of captives profess to be willing to pay their receipts to anyone authorised to receive them. The ship which General Sabine says was carried into Tangier was not taken in as a prize, but by way of

1735.

caution to prevent it giving intelligence of a Dutch ship taken by the Moors at the same time. Sir John Norris has sent some ships on the Barbary coast to prevent their cruisers, who were going out, from carrying in any English ships if they should happen to take any. 2½ *pages.*

Appending:—(*a.*) Said translation of Basha Hamet's letter to Sir Charles Wager, dated from Tangier 1735, July 6-17, concerning said bills. Signed B. Hamet Bⁿ. Ally Bⁿ. Abdalla. 1 *page.*

(*b.*) General Sabine to Sir Robert Walpole, dated from Gibraltar, 1735, August 7, concerning the above and the threatened reprisals by the Basha of Tangier. A Scotch vessel from Stranraer has just been taken into Tangier. Two other vessels of Gibraltar are also detained there. Presses the due honouring of the bills, "for, if on this occasion our commerce with Barbary is cut off this garrison can expect no fresh provisions from any other part, the Spaniards having long ago taken care to prevent the bringing of anything of that kind from their country. I, some time ago, sent his Grace of Newcastle and Sir Charles Wager a copy of a letter wrote to me by the Bashaw on the death of Mr. Solicoffre, wherein he says the peace cannot be ratified without another Ambassador comes, but, at present, the affairs of Barbary are in such confusion that it is impossible to know who is the reigning king or person in authority: notwithstanding which Nedjar, the Commander of their cruisers at Sallee, is ready to put to sea with three ships, and has been heard to say that altho' our captives are redeem'd there is no peace signed between the two Crowns." Encloses a translation [wanting] of a letter from Mequinez to show the state of anarchy the country is in. 2½ *pages.*

Said charter directed that 70*l.* thereof should be applied to the maintenance of four bursars of Divinity, and the remaining 230*l.* per annum for payment of the then debts of the said University, after payment of which the said 230*l.* should be applied partly for bursars and partly for a foreign professor. By an Act of the Treasury of Scotland of 1705, January 12, 33*l.* 6*s.* 8*d.* per annum was appointed for a professor of history out of the above tack duty, and on the 3rd December, 1705, Queen Anne granted by Privy Seal a pension of 60*l.* per annum out of said tack duty to Sarah, relict of Rev. [Before Dec. 29.] 173. Petition to Jonathan Belcher, Governor of Massachusetts Bay, and to the Council and House of Representatives, from Thos. Plaisted, merchant, late of London, now of Boston, New England. "It is the wisdom of all countreys by lawfull and industrious means to advance their export and more especially of this province, where the import vastly exceeds the export, and while that disproportion continues all other schemes of raising the sinking credit will prove ineffectual there; unquestionable, therefore, it greatly comports with the known wisdom of the legislature in this province to encourage all such manufactures as may not be injurious to the manufactures of Great Britain, especially such as the nation is under a necessity of being supplied with from foreign countreys." Therefore prays encouragement for the establishment of the manufacture of Pott-Ash, which the soap makers of London are at present obliged to get from the eastern and northern countries, but of which New England in a few years could easily be made capable of supplying 10,000*l.* or 20,000*l.* sterling value.

Jan. 8. 7. Report to the Treasury from the Taxes Commissioners on an anonymous letter sent to the Treasury concerning the indolent and careless management of the surveyors of the duties on houses in the counties of Devon and Cornwall. Fear there is too much truth in the accusation of careless management of said officers in divers parts of the kingdom. There are only four General Surveyors for the whole kingdom, one of whom is constantly employed in London and the neighbouring counties, and the other in Wales. The general decrease of these duties is, however, due to another cause, and the anonymous writer's scheme of surveyors for two or three counties and for constables, &c., would be unavailing. "From the year 1696 to the year 1709 inclusive the old duties on houses at an average had produced 118,839$^{li}\frac{12}{14}$. In the year 1710, when the additional duties took place, there being no provisionary clause to hinder the stopping up of lights, it became a practice all over England, by which means in that year the old duties amounted to no more than 115,674*l.* 10*s.* 9*d.*, and for two or three years after both the old and new duties suffered from the same cause. But since that there is no considerable variation. And if there were not some other disadvantages, which these duties labour under, they might still increase, and more especially if the manner of charging them were altered, so as to oblige the inhabitant to pay a certain duty for each window. For as it now stands a house that hath ten windows by stopping one saves four shillings, if it hath twenty by stopping one saves fourteen shillings, and if thirty by stopping one saves ten shillings. And most of the new houses which have been built since the commencement of these duties have been contriv'd so as to contain 9, 19, or 29 windows only. . . . In the next place the Justices, who are Commissioners for these duties, and from whom there is no appeal, excuse whom they think fit, either from paying anything or else from paying the full duties chargeable by the Acts of Parliament without administering an oath to the appellant or officer, and in some places are with great difficulty persuaded to act at all, and generally so late in the year that by death and removal of persons considerable sums are lost; and lastly the collectors are so remiss in their duty that in most places they omit collecting the duty for three months after the expiration of the year, and the justices' clerks, by neglecting to make out the duplicates and to return them to the Exchequer in due time, occasion great delays in making up the accounts and afford an excuse to the Receivers General for keeping money in their hands to the prejudice of the public." 2 *pages*.

1735-6.

Appending:—(*a.*) Said anonymous letter to the Treasury concerning the remissness of the surveyors. . . "Whereas there are but two or three surveyors in a county, and they being left to their own will survey as they think proper, just run over some part of their divisions, the other parts thereof scarce see such an officer above once (if that in their lifetime); and when they do survey, some persons of the towns and parishes soon get into their favour by some method or other, and then send for the parochial officer that made last year's rate and survey a few houses and so on to the next, which was formerly practiced as I often observed, and the difference cou'd be but small on their last survey, though to make it look as though they had surveyed their divisions throughout some parishes were risen 20 shillings, some 30, and others 40. . . . In sea ports and many other places vast quantities of large houses don't pay one farthing, by reason the persons that rent them are not rated to the Church and poor. . . . Again some houses that contain 20 or 30 windows and more are set out to several tenants, and therefore they tell the officers they are separate dwellings, which being so divided don't pay $\frac{1}{3}$, as otherwise they wo'd . . . " Proposes remedies for this state of things. 3 *pages.* [*Treasury Board Papers* CCXCI. No. 4.]

Feb. 20. 20. J. Scrope to the Commissioners of Customs concerning complaints at Yarmouth of the evasion of the 36th section of the Act 14 Charles II., for preventing frauds and regulating abuses in the customs. Instead of exporting fish of British or Plantation taking and curing, merchants have freighted ships to the Mediterranean with stock fish caught by foreigners, and on the return of such ships the goods imported in them have escaped the one per cent. duty as under the 35th section of the said Act. This latter section of the Act is also evaded by ships only making up their full complement of men on their return. Their Lordships therefore desire a draft of an explanatory clause proper to be passed this Session to obviate the above for the future.

Represent that the fords and banks of the Tay have of late become much shallower than formerly, and petitioners have been obliged to unload ships at Newburgh, seven miles down the river, where there is a commodious quay. But as said quay and another at Errol have been built since the port of Perth was laid out by commission from the Exchequer in 1710 neither of them is declared a lawful quay, and the Customs Commissioners have ordered no goods to be loaded or landed at either of those creeks but only at the shore of Perth, "though by the Act of Parliament and the former settlement of this port they are empowered to do so in cases of absolute necessity." Therefore pray orders for allowing the discharge of goods at Newburgh and Errol in cases of necessity as formerly, "in which case they pray that care be taken that no privilege be granted to Newburgh and Errol that might remove the custom house from this town, but that the same be confined to ships belonging to this town and freighted by our merchants." with such certainty or quantity as they ought to have: all in consideration of the fact that the said company, encouraged by the "reservoirs and other emoluments, which they enjoy in St. James's and Hyde Parks, have at an excessive charge and expense, without any profit hitherto arising to themselves, brought their works to such perfection as to supply great numbers of our subjects in the upper and lower liberties of our city of Westminster with water for their houses." Further granting said company liberty to enlarge their engine house near said reservoir in Hyde Park, and to build at their own charge under or beyond the bridge conveying the wasted water from the Serpentine in Hyde Park, through the town of Knightsbridge an engine or water wheel, the company having decided by experiments that the said waste water has power enough after great rains to turn an engine, by means of which and of the mains they have supplied, they intend to supply water in greater abundance for keeping up the great Basin in Kensington Gardens to a due and proper height: all provided the present royal works now making between said river and the said bridge or town of Knightsbridge be not damaged or prejudiced thereby. (*s.*) The Duchess of Buckingham to [Sir Robert Walpole] dated 1735-6, February 22: concerning the accounts of the reverted estate and the conduct of Mr. Herbert, her son's heir, "attacking me the first moment he could after his buriall, in Chancery and Parliament at once. . . . I have since the King's reign claimed what all his predecessors paid me for some reason or other barring now and then, except when the Earle of Oxford had power of deciding matters, he represented the case of that revenue of 1,200*li.*, that was by accident left dependant on the equity of those, who hereafter possesst King James's crown, in a light I believe made the Queen sorry that any advices or attempts had made so good natured a woman interrupt the payment of it on account of the wars she was engaged in, and what I know, that is I believe, the Duchess of Marlborough was the sole occasion of it—but that Her Majesty could have been prevailed on was the reason I refused, when marryed to the Duke of Buckingham, Lord Oxford's offer from Her Majesty to make me one of her Ladys of the Bedchamber. I can respect my superiorors, but I cannot serve them whilst I am ill-treated by any influences whatsoever. I told my Lord Oxford in as few words as I am able, who possess not a laconick stile, and told him I was very thankfull for the honour, but desired to be excused from the acceptance of it. I thankt him, who on the little acquaintance with his family, was disposed to do for me what many others would solicit extremely to obtain. I plainly told him the reason I give for not being desirous of obtaining that favour, but sho'd reckon myself obliged to him to procure me what I judged a strong equitable right from any King or Queen, to whom it was a mere trifle, but very convenient for a private person, whose fortune as it could not exceed what I might pretend too, so when it comes not in any degree up to what my situation in life might dispense with, and endeed require I sho'd be very glad to receive an addition to mine of what I reckond in some measure due to me. He had the good nature, and speedily too, which made it more obliging, to represent it in such a light as the Queen emmediately granted what he very exactly paid on my recept. King George interrupted it when he came to the Crown by being prevailed on his first seeing my name in his civill list to strike it out. Indeed he offerd to my Duke 2,000*l.* a year when he turnd him out of being President of the Councell,

1736.

and I have the copy of the letter of thanks that same night sent to Lord Townshend of his thanks for the design and refusal of the offer. Long after, in conversation with Lord Sunderland, he mentiond what was done by the King to me as what he thought much more extraordinary then the turning him out to please any sett of men: Lord Sunderland seem'd convinc'd it was hard from various considerations, and on some representations of his he gott the King to allow its being paid me in his reign, as it was till my Lord dyd: and by those payments (I am very sorry was made, since again interrupted), because it was one reason joind to some others, I knew were but too good ones, why he settled no more upon me at his death that he had settled my affairs as to the precarious ebbing and flowing 1,200*l.* per annum that it would be no more interrupted by the family on the throne as he judgd, tho when I became without the help of my Lord Duke and his estate it was then taken from me again. When I represented to Lord Sunderland once he shuffled me of with as civill words as Lord Oxford gave when I represented the case, but the one perform'd what I represented to assist me, the other forgott or for some reason or other promoted for no success. This Queen was pleas'd to begin one day on this subject herself, and said she would doe what she could, and commanded me to give in a sort of memoriall about the state of the case. I have never troubled her about doing it, tho it is soon done. It standing thus that King James was hurry'd away before he could provide for me fully, that the 10,000*l.* in money was to be kept at enterest, and this revenue of 1,600*l.* per annum was by a patent to be settled soon upon me as an additional provision, that King William thought it a debt of honour and equity upon him to perform, and payd it as regularly as most things in a court is or more . . . this King [George II.] having found no disposition to favour me in this matter and no legall formality being my case I have not troubled him upon the point, though he has reign'd so many years." . . . Prays at least to be reimbursed the value of the money spent in the improvement of the estate now devolved to the crown by the death of her son. 19 *pages.*

Dec. 16. **123.** J. Scrope to the principal officers of the Mint, enclosing for consideration and report thereon to the Treasury the representation as below from the Lord Lieutenant and Council of Ireland to the Queen in Council concerning the present state of the gold and silver coins current in that kingdom and the alterations proposed to be made in the value thereof. Treasury Chambers, December 16. 1 *page.*

Appending:—(*a.*) Order of the Queen in Council dated Kensington, 1736, November 24, referring the said representation (*b.*) as below, to the Treasury for consideration and report. 1 *page.*

(*b.*) The said representation dated Council Chamber, Dublin, 1736, May 8, from the Lord Lieutenant and Council of Ireland to the King concerning the deplorable state of that kingdom for want of

silver. "Silver is so scarce with us that the lowest premium paid for getting gold changed into silver is 4*d.* in the pound, and to increase our calamity the greatest part of the gold current here is in the two largest pieces of Portugal gold, which pass here one for 4*li.* and the other for 40*sh.*" Those through whose hands most of the money here passes receive about half their cash in these 4*li.* pieces. Rents if paid in specie are also paid in them. To get silver change for these pieces involves a loss of 6*d.*, 8*d.*, or 9*d.* in the £. This distresses the linen trade, the most valuable branch of trade here, shopkeepers and labourers and soldiers. "The occasion of our money running so much into gold and that still into the larger pieces is not only that gold has been unfortunately set here at a higher value in respect of silver than it passes for in England, so that it is a profit to bring gold into this kingdom and a loss to carry it out, but there is some advantage in bringing over the larger pieces of gold rather than the lesser. A 4*l.* piece, as it is called here, is not in England worth more than 72*s.* English, but here (where the English shilling passes for 13*d.*) it passes for 80*s.* Irish, which is 78*s.* Irish, answering to 72*s.* English, and 2*s.* more, and so the other pieces of the new Portugal species are proportionably rated. And it is much the same with the Moydore, the French Louis d'Ors, and the French and Spanish Pistoles and their respective subdivisions. And the guinea, which passes in England for 21*s.*, passes here for 23*s.* Irish, which is 21*s.* English or 1*l.* 2*s.* 9*d.* Irish and 3*d.* more. So that if any person brings over 100*l.* English from England hither he will gain about 2*l.* 15*s.* 6*d.* Irish by bringing it over in foreign gold rather than silver, and 1*l.* 3*s.* 8*d.* by bringing it over in guineas rather than silver. On the other hand if he were to take money from hence to England to pay 100*l.* there he would lose 2*l.* 15*s.* 6*d.* Irish by taking over foreign gold to pay it, and 1*l.* 3*s.* 8*d.* by taking guineas hence to pay it. So that at present nobody can afford to import silver coin hither or will export gold coin hence if he can get silver to carry out. There is likewise a disproportion between our greater and lesser pieces of foreign gold to the advantage of the greater pieces. For as their present weight and value are settled here there is 2*d.* profit in bringing over a 4*li.* piece rather than two 40*sh.* pieces, and the same profit in bringing over a 40*s.* piece rather than two 20*s.* pieces, and the same profit in bringing over a 20*s.* piece rather than two 10*s.* pieces, and whilst this is our case silver must be still decreasing with us and our gold run into the larger pieces. We beg therefore to represent it to your Majesty as our humble opinion that this evil would be remedied if the value of gold were settled here according to the inclosed paper No. 1, in which the guinea is valued at 1*l.* 2*s.* 9*d.* Irish or 21*s.* English, which it passes for in England, and the Moydore and all other foreign gold is rated at the quantity of English silver coin it usually passes for in England, only that to encourage the importation of lesser pieces of foreign gold in some measure to supply our want of silver and to get rid of our larger pieces of foreign gold, which are wholly useless in all the lesser transactions of trade, we give about a penny a piece advantage to the lesser pieces of foreign gold in respect of the larger pieces of the same species.

1736.

We humbly hope this our request will appear the more reasonable to your Majesty because when the rate of quadruple, double, and single Pistoles, and of Moydores and their subdivisions were settled in the year 1712, and when the rate of the new Louis d'ors was settled in 1714 the guinea past in England for 1*l.* 1*s.* 6*d.*, and when the new Portugal species of gold were settled in 1725 they were settled in proportion to what the Moydore had been settled at here before, as may appear by a report from the Treasury to his late Majesty dated 1725-6, January 5, in pursuance of our desire from hence that they might be set on the same footing with the Moydore: so that our foreign gold was originally rated here upon the value gold bore in England when a guinea past for 1*l.* 1*s.* 6*d.*, since which time though the guinea has been reduced 6*d.* in England yet there has been no reduction of gold since in Ireland.

As we think this reduction of gold will keep with us what little silver we have and gradually change our greater pieces of foreign gold into the lesser, in order to our getting some foreign silver, of which at present there is none current among us, we most humbly propose that the price of foreign silver here may be raised to about the middle price of silver bullion in England that it may stay with us till it is called away by the rise of the market in England. For at present the value of foreign silver coins with us is fixt at the rate of 5*s.* 7 $\frac{1}{186}$*d.* Irish per oz. or 5*s.* 2*d.* English. But as foreign silver for many years has bore a better price in England than this no merchant can utter foreign silver here as money without loss, and therefore will always send it away as a commodity to England or Holland. But if our foreign silver were raised to about 5*s.* 4$\frac{1}{2}$*d.* per ounce, which is about the middle price of silver bullion in England and comes to 5*s.* 9$\frac{3}{4}\frac{1}{611}$*d.* Irish it would be from time to time worth the merchant's while to utter foreign silver here as money. And this we humbly propose may be done by settling the Mexico piece of eight, weighing 17 pwts. 4 grs. at 5*s.* Irish, and rating all other foreign silver in proportion, as is done in the scheme annext No. 2; only that some of the pieces, to make even money, are set about a farthing a piece higher than their real value, and there is the more reason to do this because as all foreign silver passes with us by weight it still continues in the nature of bullion with us as well as it is esteemed so in England, and may therefore very reasonably be set at the middle price of silver bullion in England."

Followed by Table (*a.*):—Value set upon the several species of gold coin current in the kingdom of Ireland. (17 items.)

Table (*b.*):—Value set upon the several species of foreign silver coins. (17 items.) 8 *pages.*

Upon his decease the parish of St. Mary le Strand was by Act of Parliament separated from the Savoy, and nothing remained towards the support of the preacher but the 20*l.*, formerly allowed to the reader, and what collections could be raised by voluntary contributions among the tenants in the precinct, which with other accidental fees never amounted to 30*l.* more, and as the leases of the houses expired the substantial housekeepers retired, so that for these three years past the collections have been discontinued. Feb. 4. **18.** Petition to the Treasury from the Provost, Baillies and Town Council of Glasgow. Said city has for centuries been kindly tenents and rentallers in the milln of Partick (part of the Barony of Glasgow, formerly belonging to the Archbishops), paying for same a very high duty of 50 bolls of malt for the mill and eight bolls victuall for four acres of land, and ten marks with some hens for the miller's house. It has constantly been the practice of the Crown, when Prelacy was suppressed in Scotland, to grant feu rights to the kindly tenents and possessors of the Church's temporalities, as evidenced in particular by charters granted in 1595 by the Lord and Prior of Blantyre. The rentallers in the Bishopric of Glasgow have been adjudged to have a right perpetual in the nature of a copyhold, and upon application feu rights have never been denied to them. Are willing to lay out money on the improvement of the mill, if His Majesty will grant a feu right of the said mill and others for payment of the usual duty in name of feu farm. Therefore pray directions for the making out in the usual manner of such a feu right of the said mill, mill lands and houses for payment of the ordinary rent in name of feu farm in favour of petitioners in behalf of the city.

March 22. **34.** Report from the Commissioners of Customs, London, to the Treasury on the several petitions from the fishermen and dredgers of several oyster fisheries, concerning the difficulties they labour under by the great importation of foreign oysters, entered at low and false values. Find that foreign oysters have been imported only from France, and only into the ports of Rochester, Faversham, Colchester and Maldon. From 1718 to Christmas last 213,897 bushels have been entered at said ports. Said oysters are chargeable with several duties, amounting to 65*l.* per cent., but not being rated they have been entered at different prices, according to the oaths of the importers. The total value of the whole quantity entered in the above period was 1,621*l.* 12*s.*, a medium of under 2*d.* per bushel, and the total duty collected was 1,016*l.* 10*s.* 9¾*d.*, or about 1¼*d.* per bushel. The greatest part of said oysters have been considerably undervalued, the importers having formerly entered them from 2*s.* 6*d.* to 1*s.* per bushel, but of late years they have been sworn at 3*d.*, 2*d.*, 1*d.*, and sometimes even as low as a farthing a bushel. Propose therefore to fix a rate by law on all foreign oysters imported, as an advantage to the revenue, and to put the importers of oysters on a more equal foot. Propose as a rate, 7*d.* per bushel, Strike measure of the Winchester Corn Bushel, whereby the net duties thereon, when imported from France, will amount to about 4¼*d.* per bushel. 2 *pages.*
[*Ibid.* No. 34.]

March 23. Whitehall, Treasury Chambers. **35.** *Present:* Mr. Chancellor of the Exchequer, Mr. Dodington, Lord Sundon, Mr. Winnington.

"Mr. Scrope is to let Mr. Hedges know the King hath signed a warrant for settling 50,000*l.* per an. on the Prince of Wales, and to give him a copy thereof if he desires the same."

The Earl of Pembroke's memorial read concerning the terrace fronting the Thames before his house in Whitehall, and the Countess of Portland's action in planting forest trees upon it. Referred to the Surveyor General of Crown Lands.

"A paper containing certain queries relating to the late Duke of Buckingham's estate reverted to the Crown is read. And my Lords say they shall be ready to receive a proposal from the person for taking the said estate for such term of years as may be granted, but then the proposal is to be conceived in such manner that their Lordships may know what may arise to the Crown clear of all charges and deductions whatsoever, either by fine or rent or upon a rent only."

The Customs Commissioners' report of the 22nd instant read on the petition of the fishermen of the oyster fisheries. The Commissioners being of opinion that foreign oysters imported now unrated should have a rate fixed on them by law, and the contents of the bushel ascertained, which at present varies at different ports,

1736-7.

"My Lords order petitioners a copy of the said report, and say as those are the articles in which they desire redress they may apply to Parliament for relief."

Order for the issue to the Cofferer of the Household of 10,000*l.* in further part of 1736, Christmas quarter.

[*Treasury Minute Book* XXVIII. p. 19.]

March 23. **36.** Petition to the Treasury from the Earl of Pembroke. By grant from His late Majesty is in possession of a piece of ground, formerly in ruins, in Whitehall, with a view to the River of Thames. On this has erected a house and buildings, which in the late renewal of the lease were valued at 240*l.* The Countess of Portland has a grant of some lodgings adjoining, comprising all that part of the terrace which lies between her house and the Thames, reserving a passage for the Royal Family to take water at. Under colour of that grant said Countess has illegally taken possession of the whole terrace, and under part of it, which lies between his house and the Thames, has planted forest trees, to spoil petitioner's prospect of the river. Prays that her grant may be revoked, and so much of the terrace as lies between his house and the Thames may be granted to him on lease.

Referred to the Surveyor General of Crown Lands.

[*Reference Book* X. p. 89.]

March 23. **37.** Royal sign manual to the Attorney or Solicitor General, countersigned by the Lords of the Treasury, for preparation of a bill to pass the Great Seal of Great Britain for a grant to the Prince of Wales for the support of himself and family of 50,000*l.* per an., to commence from the Feast of the Annunciation of the Blessed Virgin next ensuing, to hold during the lives of His Majesty and said Prince. 20,000*l.* per an. of said sum to be charged on the Customs, 20,000*l.* on the Hereditary revenues of Excise applicable thereto, and the remaining 10,000*l.* to be payable out of the yearly 120,000*l.*, directed by Act 1 George II. to be set apart at the Exchequer for the use of the Civil Governmnt: to be paid monthly at the rate of 400*l.* per week, the first payment on April 1 1737: the balance remaining, to be paid on each quarter day. All at an estimate of 2,440*l.*

[*Lord Chamberlain's Warrant Book* II. pp. 69-73.]

March 23. **40.** Treasury warrant to the Customs Commissioners to pay Simeon Hayward, citizen and merchant of London, 200*li.* reward for informations concerning smuggling, as below.

Prefixing:—Report to the Treasury from said Commissioners on Hayward's memorial for reward. Hayward informed of the defrauding of the Crown in the delivery of raisins, wines, &c., by his partner, William Terry, and other merchants in the following manner, viz.:—Some masters of ships in their reports only mentioned casks in general without specifying the size, whether butts, hogsheads, whole, half or quarter barrels. The merchants did the same in their entries, and the landwaiters being corrupted by collusion set them down in their books, e.g., hogsheads of wine or quarter barrels of raisins, whereas butts and barrels had been really delivered. Also almonds had been entered in the shells, whereas they were out of the shells, which pay a greater duty. Upon trial found the matter of the information to be true, and prosecuted Terry for it. Advise reward as above.

[*Customs Book* XIV. pp. 215-8.]

March 25. **41.** Memorial to the Treasury from the Commissioners of Customs, Scotland, concerning the frequent injury to the revenue from debentures issued at Stornoway. William Smith, land surveyor at Prestonpans, attended the shipping there of the fish caught last season to observe how far the frauds complained of were committed. He reports that greater quantities of fish were certified than some of the ships could carry . . . "that besides the inconveniency and detriment to the service the fair traders are much injured, for the fishing being in the lakes upon the main land they are first obliged to ship their fish and then proceed to Stornoway, where there is no quay to land them on, but on the contrary a stony beach, which cuts the barrels and damnifies the fish, under pretence whereof it appears the officers have sometimes taken the shipmaster's oath for the quantity on board without landing, viewing, examining and branding the casks . . . . that the ships being thus detained in proceeding to the Island of Lewis is often the occasion of the loss of markets." Conceive that these inconveniences can only be remedied by removing the Custom House to the entry of Lochbroom upon the mainland, about 30 miles by land westward of Inverness, this place being centrical, among the most considerable fishing lakes, and more suitable than Bernera, which was formerly proposed. As the port of Lewis has never been set out by any Exchequer Commission pray for such a commission, whereby the residence of the officers may be fixed at some convenient place near Lochbroom.

The constant attendance in said office is so necessary for the service of the coinage and of the subject that one day's absence can seldom be dispensed with, Assays of Gold and Silver being continually receiving, working and delivering. "The business requires both skill and experience, so that your Lordship's memorialist could not upon enquiry find any person so well qualified as one Mr. Joseph Harris, of whose ability he has had experience, having employed him in the business about twelve months." [After April 15.] **63.** Memorial from the Levant Company to [the Customs Commissioners], concerning a previous memorial from themselves, the said Company, to the Treasury [of date 1736-7, February 24], relating to the lowering the duty on Smyrna raisins. Several gentlemen, traders to Valencia, having laid before the Treasury their thoughts (*a.*) on the said petition, crave to reply thereto. To confute the allegation of said gentlemen that Smyrna fruit generally sells for more than Valencia, or that it is always preferred at an equal price, have obtained the attestation (*b.*) of several eminent unbiassed grocers. Have no objections to the Treasury representing to Parliament for the lowering of the duty on Valencia fruit so long as Smyrna fruit is lowered to the same duty. The growth of Valencia fruit, whether about 65,000 baskets as usual or 90,000 baskets, as happened last year, are to a trifle all consumed in His

Majesty's dominions, there being no other principal market for them, and therefore lowering the duty on Smyrna cannot prevent their importation. "Your Honours can't forget the frequent application and trouble given you about emery stones thro' the monstrous heavy duty collected on them, and the necessity of bringing them from Smirna for want of fruit ballast, and it must occur to you that there has been scarce any fruit imported thence for some years, which, if it was of that superior goodness and esteemed with the people as those trades relate, wou'd not have been so long omitted, and we can further inform you the "Thames," a very rich ship, daily expected from Smirna, brings none, notwithstanding she wanted ballast, and is forced to have stones with lead purposely in liew thereof." 2 *pages.*

Appending:—(*a.*) Samuel Tucker, Solomon Merrett, and three others, traders to Alicante and in Denia fruit, to the Customs Commissioners, dated London, 1737, March 25: offering their observations, by way of report, on the memorial of the Turkey Company to the Treasury for the lowering of the duty on Smyrna raisins. Unless the duty on the raisins from Denia and other parts in the kingdom of Valencia are lowered in proportion it will be detrimental to every branch of trade carried on to that kingdom. "About 50 years ago a petition was presented by the traders to Malaga, requesting that the duties on raisins of the sun made there might be lowered to those paid on Denia raisins, but was rejected on proof that the importations at Malaga from the British dominions did not exceed one-third of the exportations by the English merchants, whereas the exportations from Valencia were not one-third of the importations, and the same petition being repeated about 25 years since it was again rejected for the same reasons." 4 *pages.*

April 21. **65.** Copy of the proceedings of the Privy Council at St. James's, on date hereof, in the presence of the King, on a report, detailed, from the Committee of the Council for Plantation affairs, concerning a report made by the Lords Commissioners for Trade and Plantations,, and referred to the said Committee for consideration

1737.

by an order of the King in Council of date 19 January last: said report from said Lords Commissioners being upon a representation of Mahomet, chief Sachem of the Mohegan Indians, setting forth the services to the English rendered by his ancestors and their tribe for 100 years, and complaining of the injuries received by them from His Majesty's subjects of Connecticut, who have unjustly deprived them of their lands, and reduced them to the necessity of deserting their native country for want of subsistence. A like complaint was made in 1703 by the then chief Sachem of the Mohegan Indians, and Queen Anne appointed a Commission of Investigation. Said Commission restored the Indians to several tracts of land, and condemned the Colony of Connecticut in costs. On the appeal of Sir Henry Ashurst, agent for said Colony, the order as to costs was reversed, and a fresh Commission of review was commanded by the said Queen to be issued, to determine the pretensions of the Indians to the said lands. As it does not appear whether such Commission was ever carried into effect the Lords Commissioners for Trade and Plantations propose to the said Committee of Council for Plantation Affairs that a fresh Commission of review should be issued, and that in regard to the poverty of the present Sachem and his tribe the charge thereof should be defrayed by the Crown. On the instruction of said Committee the said Lords Commissioners have prepared a draft of such Commission. Said Committee approving thereof presented same to His Majesty, who approved thereof, and ordered accordingly concerning the expense of said Commission.

Relate the substance of the complaint of said Indians against the encroachments of the inhabitants of said Province and of the previous Commission of 1704. The new Commission of enquiry ordered by the King has passed the office, and petitioners are ready to go over with it. Pray assistance to pay their debts, contracted during their long stay here in England, and for their passage back: said Mohegan Indians having been ever faithful to the English from their first settling there. 1¼ *pages.* [*Ibid.* No. 12.]

April 28. 68. The Commissioners of Taxes to the Treasury, enclosing (*a.*), concerning the House duties in Gloucestershire. Are of opinion considering the allegations therein that it would be of advantage to that branch of the public revenue to appoint an additional officer for that county at the salary of 50*l.* per an. 1 *page.*

Appending:—(*a.*) Report dated 1736, December 18, by James Underwood, one of the general riding Surveyors of House duties, on the proceedings of John Knight, Surveyor of said duties in Gloucestershire. In 1733 he surveyed 46 places in his division, and advanced the duties 26*l.* 9*s.* But there were 38*l.* 4*s.* Old Duty and 20*l.* New Duty taken off the parish assessments, so that he is sunk in his amount for that year by 10*l.* 14*s.* Old Duty and 7*l.* 5*s.* New Duty. Pursuant to an order from the Board of Taxes Commissioners of 1734, July 16, to make a thorough survey of this division by December following, "this officer with his son and other assistance set to work, and surveyed 439 places, by which the duties were considerably advanced, for, notwithstanding there was taken of the parish assessments at the appeals the sum of 46*l.* 19*s.*, yet this surveyor's up in his amount for that year 65*l.* 11*s.* in both duties.

1737.

"In the year 1735 it was thought of little purpose to survey, for most people that were advanced in the preceding year, being apprehensive of an additional tax of one shilling per window wou'd be laid upon all lights or windows, wherefore they reduced their numbers by stopping up, which sunk the Old Duty in this county, 65*l.* 4*s.*, and the New Duty, 40*l.* 15*s.* . . . . The reason why the duties sink so much in this county is the Justices' extraordinary way of acting therein, as well as in the city, where they will not allow of any shop lights or the windows in any warehouses or rooms employ'd in trade, nor maltins, cellers, brew-houses, bakehouses, &c., to pay; that together with void houses, the poverty of the inhabitants, stopping up lights, &c., hath sunk the duties since the year 1724, 250*l.* 17*s.*, notwithstanding the care and diligence of this officer, who hath been and is an exceeding good Surveyor. . . . This county is too large for any one man to survey, as it ought to be done. It is about 60 miles in length, near 40 miles over, hath 27 market towns in it, there is 444 separate assessments brought in every year . . . the present amount of the duties in the county is 3,714*l.* a year." 1½ *pages.* [*Treasury Board Papers* CCXCV. May 12. **73.** Report to the Treasury from the Commissioners of Taxes on the petition of William Elliot, Receiver General for the County of Cornwall since 1720. 1 *page.*

Appending:—(*a.*) Said petition from Elliot to the Treasury. Petitioner entered on his Receivership in 1720, the year of the South Sea Scheme, which soon sunk credit to so low a degree that trust became altogether unsafe. The Board of Taxes enjoined all the Receivers to send up their receipts to London in specie, which he complied with till credit became re-established, at an expense from Exeter alone of 10*s.* per 100*l.* the first year and 7*s.* 6*d.* per 100*l.* after. Soon after the re-establishment of credit a great flow of Portugal gold coins came into Cornwall by the packets to Falmouth, which has ever since engrossed all bills of exchange in the county and the Receivers' usual way of disposing of money for bills, by this change in the course of commerce, so totally intercepted that petitioner affirms for years together not a single bill had been offered him in the county, a few at Penzance only excepted payable in Moydores, a specie not current at the Exchequer or Bank, and so not suitable for his purpose. Has been, therefore, obliged at great expense to carry the money of his collection to Plymouth, Dartmouth, and Exeter to negotiate it for returns, and has also thereby lost 600*l.* by bad bills at Exeter. Petitioner cannot send up the money to London by carrier, even at his own great expense, because almost the whole of it is paid him in Portugal gold coins much lighter than their due standard, and at the price current of 3*l.* 18*s.* 6*d.* per ounce for sale, the loss thereof would be too great for him to bear, as he fatally experienced by sending 300*l.* value of it to the Bank about two years since, said coin not being current at the Exchequer or Bank of England, nor can it be passed at Exeter without some guineas or silver, which from necessity he is obliged to keep for that purpose. Petitioner's predecessor, Mr. Manaton, constantly

enjoyed opportunities to dispose of all his moneys with ease and safety on the spot for good bills of exchange and salt debentures. Prays consideration for his losses.

(*d.*) Certificate by Pet. Burrell and seven others, "that now and for many years past the importation of Portugal gold coin hath been so great in Cornwall that very little specie of any other kind is to be met with there, and do likewise believe that great part are given in payment for bills on London by the merchants' agents in that county, in order to comply with their principals' directions and to save them the expense of land carriage, which is $\frac{3}{8}$ per cent." 1 *page.* [*Treasury Board Papers* CCXCV. June 15. **85.** Treasury warrant to the Surveyor General of Crown Lands to make forth a constat or to send to the proper auditor for a particular of a slip of ground on the east side of St. James's Park, outside the wall in the parish of St. Margaret's, Westminster, of which the Right Hon. Charles Viscount Fane prays a reversionary lease.

Prefixing:—Said Surveyor's report dated 1734, September 5, to the Treasury on Viscount Fane's memorial for the above. Said slip of ground was formerly held by the Keepers or Rangers of said park till 1663, when a term therein was granted by the Duke of Albemarle, then Keeper of said park. Subsequently said term was purchased in by Charles II. for 260*l.*, and the ground used for the conveniency of feeding fowls and birds in said park. About 1680 some five feet in breadth was pared off by Barebone and the rest of the builders of Duke Street and Delahaye Street, by means of which encroachment the present breadth is only 25 feet. On finishing these streets there were divers applications by the inhabitants for leases of this slip of ground. Sir Edward Hales obtained a lease of it 7th December, 3 James II., &c. Details subsequent leases, and proposes a valuation for renewal.

June 17. **87.** The Duchess of Buckingham to [? John Scrope], concerning her offer for the lease of the estate and alum works of her late son, Mr. Herbert Sheffield's proceedings against her, and the general hardness of her case. "My jointure subscribed in the year twenty of 1,000*l.* per an.: the revenue my Lord dy'd concluding it could never have been stop't, the 1,200*l.* per an. from the Crown, and was pay'd on my account, and not, as a great Lady is pleas'd to say, D[uchess] of M[arlborough], that it was for secret services given to the Duke of B$^{m.}$ It was a sum too great for no services, and too little, I should think, for reall ones. Besides the loss of my son's income for his maintenance, join'd in his minority to my fortune, was an aid to it of 2,000*l.* per an. of late years, and the decision lately given of principle money of 80,000*l.* given against me makes on the whole a retrenchment of my revenues annualy that I reckon'd on, possest once, and want to be suported by of value upwards of 6,000*l.* per an. . . . All these inconveniences and delays at least I now expect in my Irish jointure, and already the payment is stopped on the disputes in the Anglesea family, makes it very necessary for me, Sir, to settle my affairs." Begs to have the delay in the passing of the lease to her cut short. 7 *pages.*

June 17. **88.** Report to the King from the Lords of the Treasury on the representation from the Lord Lieutenant and Council of Ireland, concerning the state of the gold and silver coins current in that kingdom, said representation having been referred to the Treasury by order of the Queen in Council of date 1736, November 24. For better information have transmitted the said representation to the late Master Worker and the principal officers of the Mint. Transmit herewith the opinion of the said Master Worker, and express agreement therein.

Appending:—Report to the Treasury from John Conduitt, Master Worker, Richard Morgan, Deputy Warden, and Chas. Smyth, Deputy Comptroller of the Mint, dated Mint Office, 1736-7, January 29. Have considered the said representation, which sets

1737.

forth that the valuing gold higher there than in England and the larger pieces than the lesser, occasions a great want of silver coins and smaller pieces of gold, and much distresses trade, praying that the gold coins both English and foreign may be rated at the quantity of English silver they usually pass for in England, with the allowance of some small advantage to the lesser pieces, and that the price of foreign silver coin may be raised to the middle price of silver bullion in England, being 5*s.* 4½*d.* per ounce. "We beg leave to represent to your Lordships thereupon that the gold of Portugal (which is the foreign gold that is chiefly current in Ireland) is worse in fineness than it was when the value of it was fixed in Ireland, and the guinea has since been lowered in England, and is still much too high in respect of the price silver bears here and in most other countries, and therefore it is highly reasonable and necessary to reduce the gold in Ireland at least as low as it is in England. We humbly propose that the weights and values of the gold coins may be fixed according to the paper hereunto annexed, in which the weight of the several pieces is exact and the sub-divisions thereof as near as a quarter of a grain. And to avoid fractions and encourage the importation of the smaller pieces one farthing is added to the value of the quarter Moidore and the quarter Pistole, one halfpenny to the half Pistole, half Moidore and 4*s.* 6*d.* Portugal piece, and one penny to the 9*s.* Portugal piece, and four pence is deducted from the value of the 3*l.* 12*s.* piece, and two pence from 1*l.* 16*s.* piece, as proposed in the representation from Ireland. And as it is notorious that the heavy gold pieces are culled, and hardly any but light current it seems adviseable to insert in the proclamation the usual clauses for making an allowance for light pieces and concerning scales and weights.

"Though five shillings and fourpence halfpenny is certainly the nearest middle price of standard silver in bullion in England the raising silver foreign coins to that price may be attended with many inconveniencies, for scarce any of them that are current are standard, those of the same specie differ in fineness very much from each other, many have been much debased within a few years, and the making them current at a higher rate by tale might encourage a further debasement."

Prefixing:—Reports from said Surveyor, dated 1737, April 27, and May 4, on Edwin's petition for the above. By indenture under the Great Seal of 22 July 30 Charles II. the Manor and bailiwick or reputed Manor and bailiwick of Westminster, with divers lands and tenements thereto pertaining, were demised to

1737.

Sir Joseph Sheldon, Kn^t., and Nicholas Charlton at the nomination of John Hall for 80 years from 1676, Christmas, under a rent of 7*l.* 3*s.* 4*d.* per an., excepting out of the said grant the Palaces of Whitehall and St. James's, the Exchequer, Star Chamber, the Old and New Palaces of Westminster, the Great Hall there, and such other buildings and places as were in His Majesty's possession or employed for public or common use. The premises, being parcel of the then Queen Catherine's jointure, a concurrent lease to the same persons was passed under her Great Seal 1678, December 23. "The said mannor and bayliwick, tho' demised to Sheldon and Charlton as above-menconed, were never enjoyed by them or their assigns. The Courts leet with the fines and amerciaments, and other powers and royalties atendant thereon, all waifes, estrayes, profitts of markets, goods of felons, and the like for some time have been held and injoyed by officers appointed by the Dean and Chapter of Westminster by virtue or under colour of several ancient charters granted to the Abbott and Convent of Westminster, and said to be renewed to the Dean and Chapter by letters patent under the Great Seal, bearing date 21 May, in the 2nd year of the reign of Q. Elizabeth. Whether or no those officers have not on some late occasions extended their jurisdictions beyond its due bounds may not be an improper enquiry, if your Lordships shall so direct, in order to prevent any encroachment on His Ma^t^s. adjacent Mannor of St. James's in time to come." All the benefit that has arisen to Hall by said grant has been by such tenements and small parcels of land, lying dispersed in the City of Westminster and parts adjacent, as are therein particularly mentioned. Details petitioner's interest in a portion thereof.

July 6. **103.** Treasury warrant to the Surveyor General of Crown Lands to make forth a constat, &c., of the forest and Manor of Exmoor in the counties of Somerset and Devon, of which Robert, Lord Walpole, prays a reversionary lease.

Prefixing:—Report from same dated 1737, June 30, on Lord Walpole's petition for the above. By letters patent of 21st July 12 Car. II., said King demised said forest to James, then Marquis of Ormond, for the lives of his sons, Thos., Earl of Ossory, and Richard, Lord Butler. The last of these died 1688, July 21, at Kingston Hall in Dorsetshire, and was buried at Kilkenny. By further letters patent of 15 January 12 Car. II., premises were granted to said Marquis for 31 years, from the expiry of first grant, which term expired 1719, July 21. By other letters patent of 29 December 30 Car. II. premises were demised to Richard, then Lord Arundell of Trerice for 31 years, from expiry of above prior grants, which term will expire 1750, July 21. Premises consist of a large Chace or Forest, containing 18,927*a.* 2*r.* 24*p.*, valued by the Parliament Surveyors at 473*l.* 1*s.* 6*d.* per an., together with rents certain, payable to the Lord of the Chace by the Lords of the Manors owing suit and service at the Courts, valued at 6*l.* 15*s.* 3*d.*, and profits and perquisites of Courts, valued at 13*l.* 6*s.* 8*d.* yearly.

1737.

Out of this is to be reprized the rent to the Crown of 46*l.* 13*s.* 4*d.* per an. Some consideration is also to be had to the charge of officers and keeping Courts within said forest, and to the liberties and privileges of the free suitors there, who claim and present by a jury of themselves, which they have enjoyed time out of mind, a liberty of depasturing cattle in any place of said forest at all times of the year, and of cutting turf, heath and fern, which necessarily render the profits precarious, "and seems rather a matter of honour in the country, where a considerable part of the memoralist's estate lyes, than of profit to the leasee." As the previous grants have passed without fine proposes a grant for 18 years from 1750, July 21, without fine and at the old rental of 46*l.* 13*s.* 4*d.*

Have had both memorial and proposals examined by Mr. Collyer, Surveyor General of Kent, who certifies that great quantities of tea, brandy, and other goods are daily landed on the coast of Kent, and from thence conveyed to London by great gangs of smugglers, who come down on the coast with firearms, and run their goods in defiance of the officers. Oct. 1. **141.** Propositions made to Sir Robert Walpole and other Lords of the Treasury by George Bridges, merchant of the city of Cork, for the prevention in Ireland of the clandestine running of goods prohibited, outwards in wool and inwards in brandy, wine, tea, silks, cottons, linens, &c. The ships stationed on the Irish coast seldom stir out of harbour, especially in winter, and, further, for their own interests the commanders permit several of their men to sail in merchant ships, both foreign and domestic, so that during their

1737.

stay in harbours the smugglers have an opportunity of doing what they please. Proposes in place of such ships to pay 40 sound-hearted Protestant gentlemen of property and honour, resident on the spot, as informers in the smuggling centres, and to employ three regiments of soldiers. The towns in the west are mostly Papist, all smugglers, and scarce a soldier there. The inhabitants of Bandon are Protestant, but they also are smugglers. "From Bandon to Clonakilty is but seven miles, and in that small tract and very nigh the sea is contained above 1,000 combers, whose masters is mostly smugglers, and according to computation one with another will comb up of raw wool in one week's time four stone, and that multiplied by 1,000 combers produces 4,000 stone a week comb'd up of our nationall woll, and of that complement I do firmly believe one halfe is run out of our kingdom of Ireland to France. I once saw myselfe in one evening seven vessels laden in the Bay of Clonakilty, and one Mr. Dacey and Mr. China, both riding-officers, stoned by the mob and obliged to fly for their lives. . . . There are soldiers all round the coast from Dublin to Kinsale, but they have no orders against smugglers. From Kinsale all along the west of Ireland, for the most part, there is scarce a soldier to be found, where all these combers do smuggle as affores$^{d.}$" Proposes to place troops at Bandon, Inishannon, Timolange, Clonakilty, the last being the only worst place in the west of Ireland for smuggling. "A few miles about this town are coopers, farmers, millers, pedlars, barbers, and many others sett up the combing trade, and ship it of there for France as affores$^{d.}$, and in return of this comb'd wool have brandy, wine, tea, silk, cotton, and linnins, which they sell so cheap that the fair trader is ruined. . . . In the county of Galway and along the sea coast, but perticullary at the place called Black Sod and the Isles of Aran are pernicious places." Proposes the names, detailed, of the 40 residential gentlemen, whom he advises to pension as residential spies for the lesser creeks, detailed. Proposes to prohibit wool combers from settling nearer than eight miles from the sea, and to issue proclamation against the buying, transporting, or shipping such wool, unless to an English port. . . . "Another objection proposed: How shall Ireland dispose all her wooll, when she is bound up after this maner? To this I answer if England think proper to give her exportation free of all dutys inwards here, Ireland would become her spinning house, and a door would be opened where tother shuts. Or otherwise not to medle their camblett trade, but leave them out in all these Acts before-mentioned, which for God's sake I prey you may or thous$^{ds.}$ will perish and want bread." 10 *pages.*

Said Duke was entitled to grant one-third of his pensions, as above, payable at the Excise, to a wife in jointure, and another third to trustees for 21 years for raising portions for daughters. By deed of date 1724, July 22, he granted to Thos. Pulteney and Charles Mein 1,333*l.* 6*s.* 8*d.* per an. for 21 years for this latter purpose. Said Duke died in 1730, leaving a daughter, Grace, married to the Hon. Henry Vane, Esq., and two daughters unadvanced in marriage, Lady Barbara and Lady Anne, who after raising 8,000*l.* and interest became entitled to equal moieties of the said 1,333*l.* 6*s.* 8*d.* per an. The Duchess Dowager of Cleveland

received the said annuity quarterly for her daughters, but neglecting to account with her daughters for the same, William, Duke of Cleveland, or his agents, by some suggestions, obtained a Treasury warrant of date 1734, April 22, to receive 2,666*l.* 13*s.* 4*d.*, being his own third portion and the third portion of his sisters. By colour of such warrant he has since received his sisters' portion in violation of their right. [1737.] **175.** Petition of Robert Wilson to the Treasury, for some provision on account of the merits of his father, Richard Wilson, who served 40 years first in England, and then in the revenue, Ireland.

1737.

Together with a letter of Richard Wilson, a revenue officer, Ireland, to the Lords of the Admiralty, dated London, 1732-3, January, and containing "a memorial in favour of the exports of the woollen manufactures in England and import duties of the revenue, Ireland." The French traders and their agents, who are very numerous in Ireland, have for many years made an easy purchase of Irish wool by running brandy, silk, &c., and can thus afford to undersell English merchants in foreign markets. And they have improved the trade of their manufactures abroad to that degree as to give 11*s.* 6*d.* a stone for Irish wool, whereas the constant price for many years till of late seldom exceeded 7*s.* 6*d.* per stone, and often under. Proposes regulations for the frigates and sloops stationed on the coast of Ireland, the restricting the free ports to Dublin, Waterford, and Cork, and certain articles to be settled by Parliament for the compulsion of smugglers found hovering within certain leagues of the coast, together with the prohibition of the carriage of wool to the mountainous county of Kerry, where no manufactures are. "I have only at present to add three articles more, in order to unite England and Ireland in their wool trade as formerly, and that granting any of them will turn the dispositions of the Protestant gentlemen in Ireland to a man in favour of the English interest: and how they stand now affected is no secret. (1) That they may export their woollen manufactures to foreign markets as formerly. (2) That the English traders may allow a reasonable good price for their wool. (3) That Irish worsted and woollen yarn may be encouraged to be imported into England.

Endorsed:—Memorandum left at Mr. Scrope's house. 7 *pages.*

7. Report to the same from the Salt Commissioners on the petition of Thomas Liveings, gentleman. Petitioner holds letters patents for a new compound manure, in the manufacture of which large quantities of foul salt are used, for the supply of which petitioner has also invented a new manufacture of foul salt from the brine. Said salt being useless for any other purpose

1737-8.

than as above petitioner prays for instructions from the Treasury to the Salt Commissioners not to obstruct him in the making and using of said new invented foul salt.

Have inspected samples of said foul salt, but as petitioner will not disclose its composition cannot decide whether it is capable of being reduced to pure salt or of being used as it is by leather dressers, potters, or glass makers. Cannot therefore say how far the new manufacture would affect the revenue from salt. As the laws stand said salt must certainly be liable to the payment of the present duties on English salt. 1½ *pages.*

Jan. 20. **13.** Report to the King from the Commissioners and Trustees for improving Fisheries and Manufactures in Scotland, dated from Edinburgh.

The regular sum destined for improvements as above for the year ended 1737, Christmas, was 4,000*l.*, composed of 2,000*l.* as by the Act of 5 Geo. I. and 2,000*l.* interest on 40,000*l.* lodged at different times by the King's approbation with the Royal Bank of Scotland. Out of this the Commissioners have issued:—

	£	s.	d.
For the Fishery - - - -	651	11	0
„ „ linen manufacture - - -	1,733	13	0
„ encouraging the manufacture of coarse wool - - - - -	602	0	0

Which leaves a balance of 1,012*l.* 16*s.* out of the regular fund.

As to the Fishery the bushes, three in number, have fished in deep water with considerable success. They began to fish as early as the Dutch, landed their take and set out to sea again and pursued a second fishing with reasonable success, which the Dutch because of their distance cannot conveniently do. What enabled them to do so was the additional fleet of nets bestowed by the Trustees this last season. The coast herring fishing in Loch Fyne, the Northern Lochs and the Firth of Forth extended to 31,752$\frac{1}{4}$ barrels, an excess over the preceding year of 7,509$\frac{3}{4}$ barrels. This success would be greater but for certain lawless and oppressive exactions made upon the fishers by the tenants and servants of some of the landlords of the northern coast. The Trustees have now a prosecution defending against said oppressors for same.

The linen manufacture is thriving. The total stamped for sale in the above year (exclusive of quantities made for private use, which are not liable to be stamped), was 4,721,240$\frac{3}{4}$ yards, an excess of 182,762$\frac{1}{4}$ yards over the preceding year. The quality of the linen cloth now produced is vastly improved, owing to the introduction of foreigners to disseminate the mystery. The smallness of the dealers' stocks and the scantiness of funds for improvements are the only hindrance to a more rapid development. In the matter of the process of bleaching or whitening the Commissioners have failed of success. In Holland that branch is

1737-8.

industriously kept a secret, few masters know the whole of it, and the Commissioners have not been able to obtain it either by sending young men to pry abroad or by inducing foreigners hither. They have done what they could. "They found out some persons of this country, who had passed some time in Holland and had looked a little into the whitening there before jealousy of the progress of some of their neighbours had made the Dutch lock up their secret so fast as it is now keeped, and those persons they were authorised by your Majesty in the year 1728 to encourage to set up *bleaching* or *whitening* fields by giving them a premium of 50*l.* per acre." The experience of nine years shows that the mystery has been more perfectly possessed by Andrew and William Grays than by any other. The cloth whitened at their field has been generally able to stand the comparison with any whitened at Haarlem, and the Trustees verily believe that their method, if not exactly the same, is not in any considerable article different from that used in Holland. Propose to assist the said Grays financially to extend their business, on condition of communicating the mystery to the other undertakers of whitening fields, least it should perish with them. Two years since said Commissioners issued 300*l.* to Alexander Christie to enable him to erect a bleaching or whitening field for low priced cloth at Perth, where great quantities of that sort of manufacture are made. Propose to issue a further 300*l.* to him to enable him to extend his field, in accordance with the importunate desire of the manufacturers in that neighbourhood: and another sum of 150*l.* to William Neilson to indemnify him for the cost of setting up a small field for whitening at Roslyn, near Edinburgh.

The Trustees have at present four expert Dutch weavers, each obliged to receive four young journeymen to instruct for a year. If at the end of the year the journeyman is found by examination of a piece of cloth altogether made by himself, to be sufficiently instructed the Dutch master receives 10*l.* and the journeyman receives a Dutch loom (at a cost to the Trustees of 11*l.* 17*s.* 6*d.*), and is sent into the country to instruct others. Said Commissioners propose to bring over a fifth Dutch weaver to be stationed at Glasgow, where a very commendable zeal is shown for the manufacture. Further propose to put those already perfected in the mystery of weaving fine linen apprentice on the same terms for a year to the foreign cambric weavers in Edinburgh to be perfected in the art of weaving cambrics. Some of the foreign cambric weavers brought over nine years since are dead. Said Commissioners take what care they can of their children and pray a further imprest for the support of this infant manufacture, as the number of looms just projected are not yet full.

The Flanders flax-raiser, who was brought over at an encouragement of 30*l.* per an., demands 1*s.* per day more for maintenance. As he is skilful and insists on it, propose to compound with him for 10*l.* per an. and to send him four young men each year to be instructed as flax raisers, with a premium of 5*l.* each towards

1737-8.

enabling him to entertain them. Propose to continue the salary of 30*l.* per an. to a Dutch reed maker, and 43*l.* 15*s.* for two additional journeymen to the Dutch weaver stationed at Bonnington.

The balance of savings in the present year, as above, viz., 1,012*l.* 16*s.* added to 1,905*l.* 7*s.* 7½*d.*, the surplus of the malt duty for the year ended 1735, midsummer, and other balance leaves a fund of 3,020*l.* 19*s.* 10*d.*, available for improvements. As however, the surplus of the malt duty fell in 1736 to 376*l.* 16*s.* 11¾*d.* and in 1737 to nothing at all, are therefore under a necessity to keep some of the above balance to meet contingencies. "And this shortcomeing of the Malt Duty gives your Trustees the greater concern that it seems to them to proceed principally from a cause that affects the revenue of excise in the same degree, and must continue to destroy both unless prevented by some new law to be executed with rigour. They mean the excessive use of tea, which has extended itself to the lowest degree of persons, who are encouraged to it by the smallness of the price at which the smugglers sell it, there being no possibility of guarding so wide a coast as that of Scotland from running goods by so small a number of officers as the revenue of this country can afford to keep."

Detail the various payments out of the above fund of surplus for the current year in connexion with the various kinds of improvements, as above.

Together with the detailed accounts referred to in the above report. 22 *pages.*

Appending:—(*a.*) An account, dated Edinburgh, 1737-8, January, stated by Allan Whitefoord to the King of all money issued and paid by him as Receiver General in Scotland and Cashier of the Funds applicable to the encouragement of Fisheries and Manufactures there, pursuant to precepts issued upon him by the abovesaid Commissioners and Trustees for the year ended 1737, December 25. 6 *pages.*

Prefixing:—Memorial to the Treasury from said Commissioners. By a recent report of Mr. J'ans, who was appointed to inspect the ports of Milford, Lanelly and Swansea, it appears that the smack stationed at Milford for the guard of the coast from St. David's Head to Swansea has been of little service. Have therefore dismissed the Commander, Captain Philips, and the mate, Mark Scott. Finding Milford Haven sufficiently guarded, but a want of a further guard at the ports of Swansea and Llanelly, where great numbers of ships annually load coal and culm for France, Ireland, and coastways, and further run great quantities of tea, brandy, wine and other goods, propose to discontinue the present smack as drawing too much water to be of use to prevent this practice, and in place of it to appoint two decked vessels of about 25 tons each, with a Commander and seven hands each, one to be stationed at Whiteford in Swansea port for the guard of Caermarthen Bay to Tenby westward and the Mumbles eastward; the other to be stationed at Mumbles for the guard of Swansea Bay and the coast from Barry westward to the Nash point eastward, within which district great quantities of goods are run. Recommend names of men for the service and their wages. [*Customs Book* XIV. pp. 259-60.]

of the said report and of the variety of circumstances set forth therein, do adhere to the said Commissioners in their opinion that they could not be justified in reporting 50*l.* to be a reasonable composition for so large a debt."

The present capital not being sufficient an addition of 40,000*l.* making it 151,000*l.* in whole, is desirable. In view of the uncertainty as to the standing of the Bank in case of a redemption of the Equivalent pray a grant of letters patents under the Great Seal of Scotland to ratify and confirm their privileges and to remove all doubts concerning the subsisting of the said corporation in case of redemption by Parliament, and to authorise the Bank to increase its capital, as above; "also that the proprietors of the said sum of 111,000*l.* Equivalent stock may be empowered by authority of a General Court of the Proprietors to take up, acquit and discharge the public of the aforesaid sum, and to lay out the same in such way and on such security as the Directors with consent aforesaid shall judge safe, to the end that a sure and permanent fund may still subsist for the credit of the Bank and safety of such as deal with them.

March 7. **25.** Warrant under the royal sign manual to the Lord Lieutenant of Ireland to pay to Joseph Gascoigne 1,237*l.* 2*s.* 6*d.*, as compensation for the non-performance of certain articles, whereby certain ground and other premises were to be conveyed to him in lieu of ground conveyed to the Crown, in order to the making of a new passage and gateway into Dublin Castle, and 598*l.* 3*s.* 6*d.* to Arthur Dobbs, Engineer and Surveyor General of Ireland, for works, detailed, as below, with a view to the finishing of the said new passage, in order to free and discharge the establishment of Ireland from the payment of 208*l.* 10*s.* per annum, payable to John Rathborne of the city of Dublin, merchant, under directions of George I., of date 1723-4, March 23, for non-execution of an agreement heretofore made with said Rathborne for other ground for the purpose of making the said new passage.

March 10. **27.** Report to the Treasury from the Customs Commissioners, London, on the petition of the dealers in or refiners of Borax or Tincal. Have heard petitioners thereupon, and find that Tincal or Borax is brought only from the East Indies, and it is apprehended to be a fossil dug out of the earth, mixed with a fat and muddy substance and a large quantity of dirt and stones. The quantity of unrefined Tincal imported in the three years ended 1735, December 25, was 150,845 lb., and the quantity exported in the same time was 25,115 lb. In the same period only 3 lb. of refined borax was imported and none exported. In refining it loses about $\frac{1}{3}$ weight. It is dissolved in water and refined by fire, nothing being used to make an increase of weight nor is there any substance that will incorporate with it, as petitioners allege. The chief use of it when refined is in soldering of metals and in refining gold and silver and some small quantities in medicine. It is consumed in France, Germany, Holland and other parts of Europe, and the Dutch till of late years had the sole refining of it, and supplied other nations with it when made into borax. Detail the import rates and drawback on tincal and refined borax respectively, but for fear of imposition, as the officers will be unable to judge the amount of unrefined tincal contained in the refined borax, advise against the grant of a drawback or bounty on borax refined in England. *In duplicate.* 6 *pages.*

1737-8.

Appending:—(*a.*) Said petition to the Treasury from the dealers in and refiners of borax, *ut supra p.* 300. With Treasury order of reference, of date 1736-7, March 8. 2½ *pages.*

Is of opinion that said Popple's demands should be paid from the fund raised by Major-General Hunter in 1731 by the sale of provisions intended for Brigadier Newton's and Col. Hay's regiment, then sent to Jamaica. Encloses correspondence had thereupon with Thomas Orby Hunter, the son of said Major-General Hunter, who admits he has a sum of money in his hands, but claims it as due from the Crown to his father.

March 11. **29.** Representation from the Commissioners of Revenue, Ireland, to the Treasury, concerning a trial at law, relating to a seizure, carried from the Sub-Commissioners of the district to the Commissioners of Appeals on the ground that said Sub-Commissioners had no jurisdiction over East India goods, the Act of 7 Geo. I., which prohibited the importation of East India goods into Ireland, except *viâ* England, having, so it is pretended, repealed the Act of Excise as to East India goods, and that the said seizures ought to be prosecuted in the courts at law. Desire a clause in an Act of Parliament to enable the Commissioners in Dublin and the Sub-Commissioners in their several districts to hear and determine on all seizures of East India goods imported into Ireland.

Dover Castle, concerning the prosecution he or some of his officers are under for the escape of certain smugglers out of the prison in said Castle. Detail the names of 15 smugglers who have escaped since June last. Dover Castle is the only gaol in the Cinque ports to which any person arrested within the liberty of the Lord Warden can be carried by law. But whenever any Habeas Corpus is desired by any sheriff or gaoler for removing any person to the King's Bench or the Fleet prison for greater security, it is constantly granted, pursuant to the Treasury directions of 1733-4, February 1. April 25. Whitehall, Treasury Chambers. **53.** *Present:* Mr. Chancellor of the Exchequer, Mr. Dodington, Lord Sundon, Mr. Winnington, Mr. Earle.

"Mr. Chancellor of the Exchequer will take the King's pleasure on Mr. Sheffeild's petition (now read) to be reprized the moneys by him paid on a contract of the late Duke of Bucks for suppressing of certain alum works in order to raise his own works, which are since reverted to the Crown, for the time the Crown was possessed of and had the benefit of the said works, amounting to about 800*l.*"

Order for the issue, out of public funds anno 1738, of 23,000*l.* to the Treasurer of the Navy to complete 43,000*l.* for services specified in his memorial of the 20th instant.

The report of the Customs Commissioners of the 20th instant read on the petition of Thomas More, bail for two persons arrested (and since fled) for unshipping 13 pieces of Holland from Flanders without payment of duty. The case to be proceeded with this term unless the single value of the goods and the cost of prosecution be paid.

Mr. Carkesse's letter of the 18th instant read, transmitting by order of the Customs Commissioners copies of letters from the collector and Comptroller of Dartmouth and collector of Plymouth, giving an account of their proceedings in bringing to justice the persons concerned in plundering the cargo of the Dutch ship Anna and Helena, lately stranded on the coast of Devonshire. [*Treasury Minute Book* XXVIII. p. 75.]

April 26. **54.** Report to the Treasury from Dudley Ryder, Attorney General, on the petition of Thomas Paget, Inspector of Prosecutions in the Exchequer Court, relating to uncustomed and prohibited goods, as to the stoppage of his allowance of 12*d.* per £ on a sum of 3,096*l.* 2*s.* 5*d.*, being his Majesty's share of 9,288*l.* 7*s.* 2*d.*, recovered in Michaelmas term last from the East India Company on a seizure of prohibited goods.

Finds that petitioner's office was first erected in 1686, when John Pearse was appointed for one year by virtue of a warrant from the Earl of Rochester, then Lord High Treasurer, of date 3 June 1686, "to take care that informations concerning uncustomed and prohibited goods be effectually prosecuted, and that the fines and recoveries be duly brought to the King's account." By another Treasury warrant of 1687, August 4, issued in pursuance of a report from the Customs Commissioners, Pearse was ordered an allowance of 1*s.* per £ for the half-year's service, being 233*l.* 11*s.* 8*d.* on a sum of 4,671*l.* 13*s.* 10*d.*, certified to be paid into the Exchequer for fines and forfeitures in the six months ending the December preceding. By another warrant of 1687, November 14, Pearse was appointed to the same office till further order. In 1689 Richard Hosier was appointed by a Treasury warrant and with the like allowance. In 1712 William Wynd succeeded Hosier by letters patent under the Great Seal 5 February, 1 Geo. I., with the title as above. Petitioner Paget was appointed 2 February 1727, *loco* Wynd, with the like fees, allowances, profits, &c., enjoyed by any former Inspectors. The Treasury have never issued any instructions for the office, but in the 20 December 1733 the Customs Commissioners issued instructions to Moses Montel, deputy to Paget in said office. The allowance of 1*s.* per £, as above, has never been established, and rests only on the above warrant of 1687, August 4, and subsequent practice. The method of payment hitherto has been for the Customs Commissioners, upon a certificate from the Pell office of money paid into the Exchequer, to make an order for the payment of the allowance thereon to the Inspector out of the Customs. Said Commissioners have not been guided by any certain rule in their judgment as to the sort of forfeitures liable to the above fee. Several forfeitures on prosecution have been treated as not so liable, particularly all excise cases. Cases of forfeitures determined by Justices of Peace were also exempted till 1728, when a case was stated for the Attorney General's opinion, who gave in favour of the Inspector, since which time his fees on such goods have been allowed. Details the precedents for refusal or otherwise of fees on sums recovered in particular from the East India Company. "The first warrants and the patents, tho' they vary in some of the particular expressions that constitute the office, yet all agree in confining the duty of it to the prosecution of

1738.

uncustomed and prohibited goods. The present case is clearly not within the former sort, and the latter, called prohibited goods, has a known signification in the customs laws, and is never, I think, understood to include goods that may be lawfully imported into and used in Great Britain, merely because they are carried into a foreign country, the exclusive trade to which is granted to a particular company for its private interest." 7 *pages.*

Appending:—(*a.*) Said petition of Thomas Pagett to the Treasury, with Treasury order of reference, dated 1737-8, January 31, to the Attorney General. 2 *pages.*

General Oglethorp's petition for a further supply of 400*l.* to complete the charge of raising his regiment for Georgia, referred to the Paymaster General of the Forces to state the case and his opinion thereon.

"My Lords on reading the Deputy Auditor's report on — Crump's petition to stay proceedings against Lord Lisburne and his estate for rents and arrears issuing thereout and belonging to the Crown, do order proceedings to be stayed till the end of next Michaelmas term, declaring at the same time that if Crump does not secure the said arrears and propose a method for the punctual payment of the said rents for the future by or before that time that all proceedings against his Lordship and the said estate shall be revived and carried into execution without further indulgence. [*Treasury Minute Book* XXVIII. p. 76.]

May 9.

60. Representation to the King from General Oglethorpe, concerning the recruiting fund for his regiment for Georgia. Said regiment was to be formed out of the Independent Company at Georgia, the Earl of Rothes's regiment at Gibraltar and such others as could be raised to make it up to 600 men. The regiment was complete within a month after recruiting orders were issued, "by which expedition a considerable loss falls on the captains. . . . The fund for raising the said men was the not effective money of 500 men for four months from 25 August to 24 December, which it was thought might produce 6*l.* a man, but the men being so soon raised and entertained at least five weeks before the 24th December their subsistence has reduced the fund considerably for recruiting." Petitioner's agent has received orders to pay over to the Paymaster General so much of the subsistence money as shall have been paid to the drummers and private men taken out of Lord Rothes' regiment, which from 1737, December 25, to 1737-8, February 23, for six drummers and 240 men amounts to near 400*l.*, "and is a charge too heavy for the captains at present to bear, who have so many necessaries to provide for themselves." Therefore prays that the said 400*l.* may be issued out of Army Contingencies by way of levy money.

Referred to the Paymaster General of the Forces.

For four years last past 1732, Michaelmas, to 1736, Michaelmas, the Prizage of Wines produced annually 4,038*l.* 11*s.* 3*d.* For the seven preceding years the average was 4,986*l.* 7*s.* 8*d.* If Prizage Wines in the hands of a private individual were liable to Excise this would be reduced by 1,426*l.* 2*s.* 9*d.* per an. Propose rather to abate than to raise the rent. 3 *pages.* [*Treasury Board Papers* CCXCVIII. No. 4.]

May 29. 66. The Board of Works to the Treasury. At the request of Mr. Lawton, Keeper of the Records in the Chapter House, have caused the roof of the said Chapter House to be examined, and find from the decay of the buttresses and from the want of one, many years ago taken away for the convenience of passage into the Abbey, the roof, which is an arch of stone, is in great and imminent danger of falling in. "Mr. Lawton further desires another gallery to be made and presses all round on the sides for the reception of other records. The expense of taking off the stone roof and making a timber one, leading the same, repairing the parrapit and other walls decay'd, and making another gallery with presses in the inside" may amount to about 776*l.* Recommend this as a repair immediately necessary to be proceeded on least any accident should happen. 1 *page.* [*Ibid.* No. 7.]

"That notwithstanding your memorialist was no ways concerned either in the writing, printing or publishing the said libel (other than being in Westminster Hall when the explosion was made by the said Nixon), yet your memorialist was only ordered the sum of 75*l.* for his trouble, loss of time and long confinement, when Doctor Gaylard (who was a promoter of the affair and did not only actually compose the said libel with his own hand and hired another person to print it, but also procured some and bought other materials wherewith to do it), was ordered 200*l.* . . . Dunbar, Lieutenant-Governor of New Hampshire and Surveyor General of the Woods in North America, concerning his expenses in settling people on lands deemed to be the western parts of Nova Scotia.

Find that in 1729, under the apprehension that the Crown had a right to all the lands lying between the river Penobscot and St. Croix, several persons being disposed to settle there, Col. Dunbar was empowered by royal warrant of 1730, April 27, to lay

1738.

out lands for them. He took possession of an old fort called Pemaquid, repaired it, set out six townshops in the neighbourhood, and settled about 50 families there chiefly at his own expense, as appears by the information of Henry Tripsack, Lieutenant in Col. Philipp's regiment, and Mr. George Mitchell, Deputy Surveyor of Woods and Lands. On application some time after to His Majesty in Council it was found that some other persons claimed the lands, and upon hearing it was ordered by the King in Council that the possession should be restored to such claimants and the Colony dislodged. Think some compensation ought to be made to Col. Dunbar. 3 *pages.*

Endorsed:—R[ec$^{d.}$] 13 July, read 14 July at the Committee.

Appending:—(*a.*) Said petition to the King from said Dunbar. Having been employed in the King's service in Spain petitioner suffered great hardships, being made a prisoner when endeavouring to go to Gibraltar, and brought back to Malaga, where he was confined in the common prison for three months. On his return was appointed to the above-mentioned posts, but has been disappointed in his expectations of benefit therefrom by the continual oppositions of Mr. Belcher, chief Governor of Massachusetts Bay and New Hampshire. In 1729, on a petition from great numbers of Protestant subjects in Ireland for leave to settle a new Colony in a part of the wilderness in America, then deemed by the Lords of Trade to have been in the western parts of Nova Scotia, petitioner recommended same, and the Lords of Trade advocated it, as appears from their report of 1729, May 14. On this report and before definite orders from His Majesty petitioner proceeded forthwith with the said settlement, least the Colonists who had assembled should disperse. He therefore went with above 300 of them near 60 leagues to Pemaquid and began a vigorous settlement, built a stone fort with guns and carriages, barracks for 100 men, and settled six regular townships, viz.:—Frederick's Fort, Newcastle, Walpole, Townshend, Harrington and Torrington. Petitioner received sundry marks of royal approbation, particularly in April 1730, together with the dispatch of troops from Nova Scotia to assist the settlement, said troops being quartered in said fort for more than two years. The people of Massachusetts in envy prepared to destroy the settlement till prohibited by the order in Council of 1730, November 12. Then the said people set up a claim to the government of the lands. His Majesty's right thereto was defended for more than two years by the Agents. On the 11 August 1731 the Attorney and Solicitor General reported in favour of claimants, which was confirmed by Her late Majesty in Council 1732, August 10, and petitioner ordered to quit; the Colony has been abandoned and gone back to wilderness, and petitioner coming to England to press his case has been sued and confined for the tools, &c., he provided for said Colony.

Together with an account of petitioner's disbursements in connexion with said Colony. (Total, 4,074*l.*)

July 5. **86.** Representation to the Treasury from the Corporation of Plymouth. Rice from the Plantations must be landed in England before it can be carried to Holland or any of the Northern countries. It pays duty inwards 5*s.* 0 12-20*d.* per hundred and on exportation draws back 4*s.* 5*d.* A ship with 200 tons of rice pays inwards 1,010*l.* and draws back 883*l.* 6*s.* 8*d.*, to be repaid 30 days after the sailing of the ship. The port of Plymouth is very commodious for landing and re-shipping rice designed for the North, but by the paying down and being kept out of such a sum of money the merchant loses all the benefit of his commission. Petitioners therefore pray that the merchants on paying the 7 12-20*d.*, being the duty remaining after drawback deducted, may have liberty to bond the 4*s.* 5*d.*, which is to be drawn back on the exportation, the officers of the Customs always keeping their key on rice entered inwards and immediately exported, a ship being seldom above a week landing and re-shipping her cargo.

Referred to the Customs Commissioners.

On reading a report from the Revenue Commissioners, Ireland, with a letter from the Lord Lieutenant concerning a new lease from the Earl of Arran of the Prizage and Butlerage of Wines in Ireland, their Lordships agree to another lease thereof for three years from 1738, Michaelmas, at 400*l.* [*sic* for 4,000*l.*] per an., clear of all deductions. A warrant ordered accordingly, "in which care is to be taken that the like rent be secured to be paid to the said Earl for the time the said revenues have been held over and received or to be received for the use of the Crown since the last lease thereof determined (to wit) from Michaelmas 1735 to 1738."

Prefixing:—Said Surveyor's report to the Treasury, dated 1738, May 9, on said Duke's petition for the lease. "There are two old houses standing thereon in possession of the Rt. Hon^ble^ the Lord Middleton and Sir Philip Meadows in right of their office of Comptroller of the Accounts of the Army, for whom it will be necessary some convenient office be provided, if your Lordships shall think fit to grant the desired lease."

Prefixing:—As above. "I have no survey or account of the profits of the premises remaining in my office, but find that my predecessor, Sir Charles Harbord, was of opinion that if the premises were out of lease they wou'd not produce to the Crown so much yearly revenue as the present rents amount to, which was the inducement to passing the first lease thereof to the memorialists' ancestors by King James the First, and also the subsequent ones to this time, without fine." [*Irish Book* IX. pp. 140-1.]

[Before July 7.] **92.** Memorial to the Treasury from the Trustees of the Kensington Turnpike, signed by J. Bowack, clerk to said Trustees. The road at the East entrance of the town of Kensington to the old gate leading into Hyde Park by the wall of His Majesty's gardens is exceeding bad in the winter, and as it were one continued slough, notwithstanding great quantities of screened ballast laid on it annually by said Trust for the last twelve years. It is apprehended there is no method to effectually repair it but by raising said road and paving it with substantial pebbles. Before the Act of Parliament which created this Trust the aforesaid part of the road was kept in repair at the sole expense of His Majesty. Being in debt pray that the said road should be raised and paved at His Majesty's expense, when memorialists will in future undertake the repair.
Endorsed:—1738, July 7. "The sums received by the Turnpike are sufficient for this service." 1 *page.*

Prefixing:—(1.) Copy of letter from same to his deputy, Captain William Sharman, dated London, 1738, July 12, requiring an answer to said letter of the deputies.

(2.) Said Sharman's reply to said Finch, traversing point by point the letter from the said deputies. "Governor Kane was forc'd to use threats and often shew'd disregard to many of the people of Minorca before he could prevail upon them to tell truth or represent reall facts, and now since his death they are returned to their old vice, for I assure you, Sir, that that island is almost as much improved as it is possible, and had you seen it 26 years ago, together with the poor thereof, their dress, manner of living, &c., you would be convinced of the false representations of these deputies. . . . This is not the only combination that has been form'd to diminish the King's revenues: but as Lieut.-Colonel Pinfold is no longer Commandant, so their Lordships will be no more troubled with such unusual applications. 4 *pages.*

Appending:—(*a.*) Translation from the Spanish of the letter to the Treasury from the said deputies of the Jurats, viz.: Dr. Simon Oliver and Cardona of Ciudadela, Dr. Frans. Caules of Mahon, Bartholomew Mascaro of Alayor, Thomas Castell of Mercadal. 2 *pages.*

103. Memorial to the Treasury from Henry McCulloch ("Mc Culloh"), concerning the frauds, encroachments and abuses put upon the Crown in the American Colonies. North and South Carolina are now in a confused, uncertain and lawless state with regard to His Majesty's revenues and the grants of land. The Crown officers are insulted when they demand the quit rents. On a representation to the King of petitioner's proposals of remedy by the appointment of an officer thereto, the Committee of the Privy Council, after favourable report thereon from the Lords of Trade and Plantations, approved thereof, but directed no report to be made to the King in Council till petitioner inform the Committee how he desires to be paid and what amount, as said officer. Thinks this a matter for decision by the Treasury. In 1712 Mr. Nicholson was appointed such a Commissioner to enquire into the state of affairs in America.

Minuted as under date 15 August, *infra.* 3 *pages.*

Appending:—(*a.*) A short state of the many frauds and abuses committed in the time of and under the Lords Proprietors in South and North Carolina with respect to the grants of lands and the quit rents thereon. 3 *pages.*

(*b.*) A short state of the many difficulties and inconveniences the Crown labour under with respect to their lands in South and North Carolina, and the quit rents arising therefrom on account of the royal instructions not having been duly observed. 4 *pages.*

Appending:—(*a.*) G. Blenkinsop, supervisor of Excise at Bath, to the said Commissioners, dated Bath, 1738. October 14. Several prosecutions have been had against the unruly colliers in Kingswood Forest for illicit selling of ale and cider. On an attempt to levy the fines by distress the savage crew resisted by firearms and other instruments of defence. "And they swear they'l neither pay fines nor duty, which gives occasion to the persons now under survey to say they will pay no duty if the others are not taken a course with. . . . There are now in the Forrest not less than 1,000 men, women and boys in armes, destroying all before them; that the officers and myself have been hindered for three or four days from executing our offices. These savage people are so vile as to stop every person they meet in the roads thro' the Forrest and other adjacent places, and either take their money, beat the persons or strip off their cloaths, so in my humble opinion nothing will reduce such vile wretches to a subjection to the laws but a military force." 1 *page.*

149. Two papers (*a.*) and (*b.*), lacking the covering document, relating to demands for allowances on behalf of Richard Kane for expenses in 1726, when Lieutenant-Governor and Commander-in-Chief of Gibraltar, as follow:—

(*a.*) Certificate, dated 1737-8, January 12, by Colonel Robinson Sowl as to certain contingent expenses in connexion with the garrison of Gibraltar as contained in the following statement prefixed to said certificate.

"In the months of November and December, 1726, the Spaniards, drawing down great bodies of troop in the neighbourhood and making other warlike preparations, gave great umbrage to the late Brigadier-General Richard Kane, then Lieut.-Governor and Commander-in-Chief of that place.

"That Major Robinson Sowle was then in garrison there and had the honour to be advised with and consulted by Govr. Kane. The engineer and officers of the Ordnance there had received orders from their principals in what manner to continue the works and expend the money for that service.

"Govr. Kane, finding several things necessary to be done that Captain Moore, the chief engineer, could not undertake, being restrained by the above order, Govr. Kane was obliged to furnish money and employ the inhabitants. Particular 120 men were daily employd in sorting the store and carrying em from the general magazine to the several posts, and this work continued for about two months.

1738.

"Several people were sent into the country for intelligence, and Sowle was sent out five different time. Col. Battereau was twice sent out. Several of the Genoese were out for a weeke at a time. A Genoese was dispatched to Malaga, and a vessel hired for that purpose upon a report that Col. Dunbar had been secured by the Spaniards as he was comeing from Madrid with Dispatches for the Governor. Col. Dunbar, having found means to leave his papers on board the vessel from which he was taken, the master of that vessel brought the letters and was paid by Govr. Kane. An Algereen lay near four months under the protection of the cannon of Gibraltar for fear of the Dutch Squadron. This was in the beginning of the year 1726, and this was a considerable expense to the Govr." 1½ *pages.*

(*b.*) Similar certificate as to the like expenses, as above, by Governor Kane for the said garrison, attested by Peter Laprimaudaye, engineer, dated London, 1737-8, February 6. Further "that he [Gov. Kane] kept a publick table, that he gave many entertainments to the Dutch Squadron, under the command of Admiral Somelsdick, and Spanish officers of distinction from the camp near the town, that he gave balls and entertainments on the birthdays of the royal family and several incident charges." 1 *page.* [*Treasury Board Papers* CCXCIX. No. 15.]

Nov. 4. **150.** Royal warrant to William Benson and William Aislabie, Auditors of Imprests, to pass Brigadier-General Richard Kane's account of contingencies for the garrison of Minorca and Gibraltar between 1712, June 7, and 1737, December 19, the day of the said Kane's death: the surplusage of 409*l.* 19*s.* 6½*d.* owing to accomptant thereupon being waived by accomptant and the account left quit and even. "And in case the trouble and charge of passing of a distinct and separate account thereof in the course of our Exchequer may be avoided by incorporating the same in any the accounts of the Paymaster General of our Forces, which lie before you or either of you to be passed, our further will and pleasure is and we do hereby authorise and empower you in such case to bring over and charge in the front of such Paymaster General's account the sum of 39,232*l.* 7*s.* 11*d.* for the insupers set on this account as aforesaid, and to give full and plenary allowance in the discharge part of the said Paymaster General's account of the several claims and expenses allowed and approved by us according to the said state."

Appending:—Said statement of account, certified by Edward Bangham, deputy to Auditor William Benson, 1738, July 26, as exhibited by Captain John Dobbin, sole executor of said Brigadier-General Richard Kane, deceased. (Total of charge, 39,232*l.* 7*s.* 11*d.*; total of discharge, 39,642*l.* 7*s.* 5½*d.*; said discharges being on account of the garrison in Minorca 1712-36, detailing many items of historical interest, and for Gibraltar as follows:—"Extraordinary and contingent expenses upon his journey from Minorca and Gibraltar and during his stay there in the year 1720, being appointed by the Lords Justices Commander-in-Chief in

Nov. 4. **151.** Treasury warrant to the Customs Commissioners for preparation of a commission to make a wharf, as below, at Lancaster a lawful quay at the merchants' charge.

Prefixing:—Memorial to the Treasury from said Commissioners, relating to an application from the principal merchants and traders at Lancaster concerning the inconveniences and extraordinary charges incurred in the loading and discharging of vessels at the present lawful landing place there, by reason of the Custom House and King's Beams being situated above the Bridge of the town, and praying for a Custom House be provided below the Bridge, where there are convenient buildings and where there is a good wharf. Find that the situation of the port of Lancaster is such that the only place at present set out for the landing and delivering all foreign goods is on the north side of the river, where the goods are unloaded at low water without any quays, wharves or other conveniences, for which reason it has been the practice when goods are there laid on shore before the next tide to bring them by carts under the charge of tidesmen to the weighing house, an unfree place, which stands opposite to the present Custom House, where they are examined. To avoid this trouble the merchants are willing to be at the expense of taking out and executing a new commission for appointing a convenient lawful quay below the Bridge. Temple (1656, September 26, and 1662); then by him in 1670 surrendered to the French under the Treaty of Breda; but in 1674 devised by Temple to John Nelson, his nephew; recovered to England by Sir Wm. Phipps 1690, April 28-May 30; restored to the French 1697; recaptured in 1710; and yielded to Great Britain 1712 by the Treaty of Utrecht; and sold by Nelson in 1730 to Samuel Waldo of Boston, New England. Such a colony as is here proposed to be erected in Nova Scotia joined with other nothern Provinces may with the assistance of Great Britain be able to curb the growing power of the French at Canada or Nova Francia, and finally be a means for the King of Great Britain to acquire the sole Sovereignty of all North America. 4 *pages.* [*Treasury Board Papers* CCXCIX. CALENDARS OF STATE PAPERS, &c.

[Imperial 8vo., cloth. *Price* 15*s.* each Volume or Part.]

Subsequent to recommendations of Committees of the House of Commons in 1800 and 1836, the Master of the Rolls, in 1865, stated to the Lords of the Treasury that although "the Records, State Papers, "and Documents in his charge constitute the most complete and perfect "series of their kind in the civilized world," and although "they are "of the greatest value in a historical and constitutional point of view, yet "they are comparatively useless to the public, from the want of proper "Calendars and Indexes." Whereupon their Lordships assented to the necessity of having Calendars prepared and printed, and empowered the Master of the Rolls to take such steps as might be necessary for this purpose.

   Capgrave's Chronicle extends from the creation of the world to the year 1417. Being written in English, it is of value as a record of the language spoken in Norfolk.

2. Chronicon Monasterii de Abingdon. Vols. I. and II. *Edited by* the Rev. Joseph Stephenson, M.A., Vicar of Leighton Buzzard. 1858.

   This Chronicle traces the history of the monastery from its foundation by King Ina of Wessex, to the reign of Richard I. The author incorporates into his history various charters of the Saxon kings, as illustrating not only the history of the locality but that of the kingdom.

3. Lives of Edward the Confessor. I.—La Estoire de Seint Aedward le Rei. II.—Vita Beati Edvardi Regis et Confessoris. III.—Vita Æduuardi Regis qui apud Westmonasterium requiescit. *Edited by* Henry Richards Luard, M.A., Fellow and Assistant Tutor of Trinity College, Cambridge. 1858.

   The first is a poem in French, probably written in 1245. The second is an anonymous poem, written between 1440 and 1450, which is mainly valuable as a specimen of the Latin poetry of the time. The third, also by an anonymous author, was apparently written between 1066 and 1074.

4. Monumenta Franciscana.

   Vol. I.—Thomas de Eccleston de Adventu Fratrum Minorum in Angliam. Adæ de Marisco Epistolæ. Registrum Fratrum Minorum Londoniæ. *Edited by* J. S. Brewer, M.A., Professor of English Literature, King's College, London.

5. Fasciculi Zizaniorum Magistri Johannis Wyclif cum Tritico. Ascribed to Thomas Netter, of Walden, Provincial of the Carmelite Order in England, and Confessor to King Henry the Fifth. *Edited by* the Rev. W. W. Shirley, M.A., Tutor and late Fellow of Wadham College, Oxford. 1858.

   This work gives the only contemporaneous account of the rise of the Lollards.

6. The Buik of the Croniclis of Scotland; or, A Metrical Version of the History of Hector Boece; by William Stewart. Vols. I.-III. *Edited by* W. B. Turnbull, Barrister-at-Law. 1858.

   This is a metrical translation of a Latin Prose Chronicle, written in the first half of the 16th century. The narrative begins with the earliest legends and ends with the death of James I. of Scotland, and the "evil ending of the traitors that slew him." The peculiarities of the Scottish dialect are well illustrated in this version.

7. Johannis Capgrave Liber de Illustribus Henricis. *Edited by* the Rev. F. C. Hingeston, M.A. 1858.

   The first part relates only to the history of the Empire from the election of Henry I. the Fowler, to the end of the reign of the Emperor Henry VI. The second part is devoted to English history, from the accession of Henry I. in 1100, to 1446, which was the twenty-fourth year of the reign of Henry VI. The third part contains the lives of illustrious men who have borne the name of Henry in various parts of the world

8. Historia Monasterii S. Augustini Cantuariensis by Thomas of Elmham, formerly Monk and Treasurer of that Foundation. *Edited by* Charles Hardwick, M.A., Fellow of St. Catherine's Hall, and Christian Advocate in the University of Cambridge. 1858.

This is a Latin Chronicle extending from the Creation to the latter part of the reign of Edward III., with a continuation to the year 1413.

The contents of this volume are—(1) a life of Henry VII., by his poet Laureate and historiographer, Bernard André, of Toulouse, with some compositions in verse, of which he is supposed to have been the author; (2) the journals of Roger Machado during certain embassies to Spain and Brittany, the first of which had reference to the marriage of the King's son, Arthur, with Catharine of Arragon; (3) two curious reports by envoys sent to Spain in 1505 touching the succession to the Crown of Castile, and a project of marriage between Henry VII. and the Queen of Naples; and (4) an account of Philip of Castile's reception in England in 1506. Other documents of interest are given in an appendix.

The *Liber Custumarum* was compiled in the early part of the 14th century during the reign of Edward II. It also gives an account of the laws, regulations, and institutions of the City of London in the 12th, 13th, and early part of the 14th centuries.

13. Chronica Johannis de Oxenedes. *Edited by* Sir Henry Ellis, K.H. 1859.

Although this Chronicle tells of the arrival of Hengist and Horsa, it substantially begins with the reign of King Alfred, and comes down to 1292. It is particularly valuable for notices of events in the eastern portions of the kingdom.

14. A Collection of Political Poems and Songs relating to English History, from the accession of Edward III. to the reign of Henry VIII. Vols. I. and II. *Edited by* Thomas Wright, M.A. 1859-1861.

The author was born about the end of the fourteenth century, consecrated Bishop of St. Asaph in the year 1444, and translated to the see of Chichester in 1450. His work gives a full account of the views of the Lollards, and has great value for the philologist.

20. Annales Cambriæ. *Edited by* the Rev. John Williams ab Ithel, M.A. 1860.

These annals, which are in Latin, commence in 447, and come down to 1288. The earlier portion appears to be taken from an Irish Chronicle used by Tigernach, and by the compiler of the Annals of Ulster.

21. The Works of Giraldus Cambrensis. Vols. I.-IV. *Edited by* the Rev. J. S. Brewer, M.A., Professor of English Literature, King's College, London. Vols. V.-VII. *Edited by* the Rev. James F. These volumes contain the historical works of Gerald du Barry, who lived in the reigns of Henry II., Richard I., and John.

The *Topographia Hibernica* (in Vol. V.) is the result of Giraldus' two visits to Ireland, the first in 1183, the second in 1185-6, when he accompanied Prince John into that country. The *Expugnatio Hibernica* was written about 1188. Vol. VI. contains the *Itinerarium Kambriæ et Descriptio Kambriæ;* and Vol. VII., the lives of S. Remigius and S. Hugh. Vol. VIII. contains the Treatise *De Principum Instructione*, and an index to Vols. I.-IV. and VIII.

There are at present six independent manuscripts of the Saxon Chronicle, ending in different years, and written in different parts of the country. In this edition, the text of each manuscript is printed in columns on the same page, so that the student may see at a glance the various changes which occur in orthography.

7. Ypodigma Neustriæ a Thoma Walsingham, quondam monacho Monasterii S. Albani, conscriptum.

Edited by Henry Thomas Riley, M.A., Barrister-at-Law. 1863-1876.

In the first two volumes is a History of England, from the death of Henry III. to the death of Henry V., by Thomas Walsingham, Precentor of St. Albans.

In the 3rd volume is a Chronicle of English History, attributed to William Rishanger, who lived in the reign of Edward I.: an account of transactions attending the award of the kingdom of Scotland to John Balliol, 1291-1292, also attributed to William Rishanger, but on no sufficient ground: a short Chronicle of English History, 1292 to 1300, by an unknown hand: a short Chronicle, Willelmi Rishanger Gesta Edwardi Primi, Regis Angliæ, probably by the same hand: and fragments of three Chronicles of English History, 1285 to 1307.

In the 4th volume is a Chronicle of English History, 1259 to 1296: Annals of Edward II., 1307 to 1323, by John de Trokelowe, a monk of St. Albans, and a continuation of Trokelowe's Annals, 1323, 1324, by Henry de Blaneforde: a full Chronicle of English History, 1392 to 1406. and an account of the benefactors of St. Albans, written in the early part of the 15th century,

The 5th, 6th, and 7th volumes contain a history of the Abbots of St. Albans, 793 to 1411 mainly compiled by Thomas Walsingham, with a Continuation.

The 8th and 9th volumes, in continuation of the Annals, contain a Chronicle probably of John Amundesham, a monk of St. Albans.

The 10th and 11th volumes relate especially to the acts and proceedings of Abbots Whethamstede, Albon, and Wallingford.

The 12th volume contains a compendious History of England to the reign of Henry V. and of Normandy in early times, also by Thomas Walsingham, and dedicated to Henry V.

29. Chronicon Abbatiæ Eveshamensis, Auctoribus Dominico Priore Eveshamiæ et Thoma de Marleberge Abbate, a fundatione ad annum 1213, una cum continuatione ad annum 1418. *Edited by* the Rev. W. D. Macray, Bodleian Library, Oxford. 1863.

The Chronicle of Evesham illustrates the history of that important monastery from 690 to 1418. Its chief feature is an autobiography, which makes us acquainted with the inner daily life of a great abbey. Interspersed are many notices of general, personal, and local history.

30. Ricardi de Cirencestria Speculum Historiale de Gestis Regum Angliæ. Vol. I., 447-871. Vol. II., 872-1066. *Edited by* John E. B. Mayor, M.A., Fellow of St. John's College, Cambridge. 1863-1869.

Richard of Cirencester's history is in four books, and gives many charters in favour of Westminster Abbey, and a very full account of the lives and miracles of the saints especially of Edward the Confessor, whose reign occupies the fourth book. A treatise on the Coronation, by William of Sudbury, a monk of Westminster, fills book ii. c. 3.

31. Year Books of the Reigns of Edward the First and Edward the Third. Years 20-21, 21-22, 30-31, 32-33, and 33-35 Edw. I; and 11-12 Edw. 38. Chronicles and Memorials of the Reign of Richard the First.

Vol. I.:—Itinerarium Peregrinorum et Gesta Regis Ricardi.

Vol. II.:—Epistolæ Cantuarienses; the Letters of the Prior and Convent of Christ Church, Canterbury; 1187 to 1199.

Edited by the Rev. William Stubbs, M.A., Vicar of Navestock, Essex, and Lambeth Librarian. 1864-1865.

The authorship of the Chronicle in Vol. I., hitherto ascribed to Geoffrey Vinesauf, is now more correctly ascribed to Richard, Canon of the Holy Trinity of London.

The letters in Vol. II., written between 1187 and 1199, had their origin in a dispute which arose from the attempts of Baldwin and Hubert, archbishops of Canterbury, to found a college of secular canons, a project which gave great umbrage to the monks of Canterbury.

39. Recueil des Croniques et anchiennes Istories de la Grant Bretaigne a present nomme Engleterre, par Jehan de Waurin. Vol. I., Albina to 688. Vol. II., 1399-1422. 40. A Collection of the Chronicles and Ancient Histories of Great Britain, now called England, by John de Waurin. Vol. I., Albina to 688. Vol. II., 1399-1422. Vol. III., 1422-1431. (Translations of the preceding Vols. I., II., and III.) *Edited and translated by* Sir William Hardy, F.S.A., and Edward L. C. P. Hardy, F.S.A. 1864-1891.

41. Polychronicon Ranulphi Higden, with Trevisa's Translation. Vols. I and II. *Edited by* Churchill Babington, B.D., Senior Fellow of St John's College, Cambridge. Vols. III.-IX. *Edited by* the Rev. Joseph Rawson Lumby, D.D., Norrisian Professor of Divinity, Vicar of St. Edward's, Fellow of St. Catharine's College, and late Fellow of Magdalene College, Cambridge. 1865-1886.

This chronicle begins with the Creation, and is brought down to the reign of Edward III. The two English translations, which are printed with the original Latin, afford interesting illustrations of the gradual change of our language, for one was made in the fourteenth century, the other in the fifteenth.

42. Le Livere de Reis de Brittanie e Le Livere de Reis de Engletere. *Edited by* the Rev. John Glover, M.A., Vicar of Brading, Isle of Wight, formerly Librarian of Trinity College, Cambridge. 1865.

These two treaties are valuable as careful abstracts of previous historians.

43. Chronica Monasterii de Melsa ab anno 1150 usque ad annum 1406, Vols. I.-III. *Edited by* Edward Augustus Bond, Assistant Keeper of Manuscripts, and Egerton Librarian, British Museum. 1866-1868.

44. Matthæi Parisiensis Historia Anglorum, sive ut vulgo dicitur, Historia Minor. Vols. I.,-III. 1067-1253. *Edited by* Sir Frederick Madden, K.H., Keeper of the Manuscript Department of the British Museum. 1866-1869.

45. Liber Monasterii de Hyda: a Chronicle and Chartulary of Hyde Abbey, Winchester, 455-1023. *Edited by* Edward Edwards. 1866.

The "Book of Hyde" is a compilation from much earlier sources, which are usually indicated with considerable care and precision. In many cases, however, the Hyde Chronicler appears to correct, to qualify, or to amplify the statements which, in substance, he adopts.

There is to be found, in the "Book of Hyde," much information relating to the reign of King Alfred which is not known to exist elsewhere. The volume contains some curious specimens of Anglo-Saxon and mediæval English.

46. Chronicon Scotorum. A Chronicle of Irish Affairs, from the earliest times to 1135; and Supplement, containing the events from 1141 to 1150. *Edited, with Translation, by* William Maunsell Hennessy, M.R.I.A. 1866.

47. The Chronicle of Pierre de Langtoft, in French Verse, from the earliest period to the death of Edward I. Vols. I. and II. *Edited by* Thomas Wright, M.A. 1866-1868.

It is probable that Pierre de Langtoft was a canon of Bridlington, in Yorkshire, and lived in the reign of Edward I., and during a portion of the reign of Edward II. This chronicle is divided into three parts; in the first, is an abridgment of Geoffrey of Monmouth's "Historia Britonum"; in the second, a history of the Anglo-Saxon and Norman kings, to the death of Henry III.; in the third, a history of the reign of Edward I. The language is a specimen of the French of Yorkshire.

48. The War of the Gaedhil with the Gaill, or The Invasions of Ireland by the Danes and other Norsemen. *Edited, with a Translation, by* the Rev. James Henthorn Todd, D.D., Senior Fellow of Trinity College, and Regius Professor of Hebrew in the University of Dublin. 1867.

49. Gesta Regis Henrici Secundi Benedicti Abbatis. Chronicle of the Reigns of Henry II. and Richard I., 1169-1192, known under the name of Benedict of Peterborough. Vols. I. and II. *Edited by* the Rev. William Stubbs, M.A., Regius Professor of Modern History, Oxford, and Lambeth Librarian. 1867.

50. Munimenta Academica, or, Documents illustrative of Academical Life and Studies at Oxford (in Two Parts). *Edited by* the Rev. Henry Anstey, M.A., Vicar of St. Wendron, Cornwall, and late Vice-Principal of St. Mary Hall, Oxford. 1868.

51. Chronica Magistri Rogeri de Houedene. Vols. I.-IV. *Edited by* the Rev. William Stubbs, M.A., Regius Professor of Modern History and Fellow of Oriel College, Oxford. 1868-1871.

The earlier portion, extending from 732 to 1148, appears to be a copy of a compilation made in Northumbria about 1161, to which Hoveden added little. From 1148 to 1169—a very valuable portion of this work—the matter is derived from another source, to which Hoveden appears to have supplied little. From 1170 to 1192 is the portion which corresponds to some extent with the Chronicle known under the name of Benedict of Peterborough (*see* No. 49). From 1192 to 1201 may be said to be wholly Hoveden's work.

52. Willelmi Malmesbiriensis Monachi De Gestis Pontificum Anglorum Libri Quinque. *Edited by* N. E. S. A. Hamilton, of the Department of Manuscripts, British Museum. 1870.

53. Historic and Municipal Documents of Ireland, from the Archives of the City of Dublin, &c. 1172-1320. *Edited by* John T. Gilbert, F.S.A., Secretary of the Public Record Office of Ireland. 1870.

54. The Annals of Loch Cé. A Chronicle of Irish Affairs, from 1041 to 1590. Vols. I. and II. *Edited, with a Translation, by* William Maunsell Hennessy, M.R.I.A. 1871.

This book contains the ancient ordinances and laws relating to the navy.

56. Memorials of the Reign of Henry VI.:—Official Correspondence of Thomas Bekynton, Secretary to Henry VI., and Bishop of Bath and Wells. *Edited by* the Rev. George Williams, B.D., Vicar of Ringwood, late Fellow of King's College, Cambridge. Vols. I. and II. 1872.

57. Matthæi Parisiensis, Monachi Sancti Albani, Chronica Majora. Vol. I. The Creation to A.D. 1066. Vol. II. 1067 to 1216. Vol. III. 1216 to 1239. Vol. IV. 1240 to 1247. Vol. V. 1248 to 1259. Vol. VI. Additamenta. Vol. VII. Index. *Edited by* the Rev. Henry Richards Luard, D.D., Fellow of Trinity College, Registrary of the University, and Vicar of Great St. Mary's, Cambridge. 1872-1884.

WORKS PUBLISHED IN PHOTOZINCOGRAPHY.

DOMESDAY BOOK, or the GREAT SURVEY OF ENGLAND OF WILLIAM THE CONQUEROR, 1086; fac-simile of the Part relating to each county, separately (with a few exceptions of double counties). Photozincographed at the Ordnance Survey Office, Southampton, by Colonel Sir HENRY JAMES, R.E., F.R.S., DIRECTOR-GENERAL of the ORDNANCE SURVEY, under the superintendence of W. BASEVI SANDERS, an Assistant Record Keeper. 35 Parts, imperial quarto and demy quarto (1861-1863), boards.

Domesday Survey is in two parts or volumes. The first, in folio, contains the counties of Bedford, Berks, Bucks, Cambridge, Chester, and Lancaster, Cornwall, Derby, Devon, Dorset, Gloucester, Hants, Hereford, Herts, Huntingdon, Kent, Leicester and Rutland, Lincoln, Middlesex, Northampton, Nottingham, Oxford, Salop, Somerset, Stafford, Surrey, Sussex, Warwick, Wilts, Worcester, and York. The second volume, in quarto, contains the counties of Essex, Norfolk, and Suffolk.

Domesday Book was printed *verbatim et literatim* during the last century, in consequence of an address of the House of Lords to King George III. in 1767. It was not, however, commenced until 1773, and was completed early in 1783. In 1860, Her Majesty's Government, with the concurrence of the Master of the Rolls, determined to apply the art of photozincography in the production of a fac-simile of Domesday Book.

This work forms a comprehensive Palæographic Series for Ireland. It furnishes characteristic specimens of the documents which have come down from each of the classes which, in past ages, formed principal elements in the population of Ireland, or exercised an influence in her affairs. With these reproductions are combined fac-similes of writings connected with eminent personages or transactions of importance in the annals of the country to the early part of the eighteenth century.

The specimens have been reproduced as nearly as possible in accordance with the originals, in dimensions, colouring, and general appearance. Characteristic examples of styles of writing and caligraphic ornamentation are, as far as practicable, associated with subjects of historic and linguistic interest. Descriptions of the various manuscripts are given by the Editor in the Introduction. The contents of the specimens are fully elucidated and printed in the original languages, opposite to the Fac-similes—line for line—without contractions—thus facilitating reference and aiding effectively those interested in palæographic studies.

In the work are also printed in full, for the first time, many original and important historical documents.

Part I. commences with the earliest Irish MSS. extant.

Part II.: From the Twelfth Century to A.D. 1299.

Part III.: From A.D. 1300 to end of reign of Henry VIII.

Part IV. 1: From reign of Edward VI. to that of James I.

In part IV. 2 the work is carried down to the early part of the eighteenth century, with Index to the entire publication.
